## TIMSS 2011 <br> Characteristics of National Samples

## Armenia

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 6) and special needs schools.
- No within-school exclusions.

Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by province (11) and region within Yerevan (11).
- Sampled two classrooms per school in large schools (MOS > 45).
- Overlap was maximized between the Grade 4 and Grade 8 school samples. Both samples drawn at once.

Exhibit 1: Allocation of School Sample in Armenia, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st <br> Replacements | 2nd Replacements |  |  |
| Grade 4 only | 2 | 0 | 2 | 0 | 0 | 0 | 0 |
| Grade 4 \& Grade 8 | 148 | 0 | 148 | 0 | 0 | 0 | 0 |
| Total | 150 | 0 | 150 | 0 | 0 | 0 | 0 |

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 6) and special needs schools.
- No within-school exclusions.

Sample Design

- Explicit stratification by "Grade 8" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by province (11) and region within Yerevan (11).
- Sampled two classrooms per school in large schools (MOS >45).
- Students assessed at Grade 9 due to new educational structure (student mean age comparable to previous cycles).
- Overlap was maximized between the Grade 4 and Grade 8 school samples.

Exhibit 2: Allocation of School Sample in Armenia, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Grade 8 only | 5 | 0 | 5 | 0 | 0 | 0 | 0 |
| Grade 4 \& Grade 8 | 148 | 0 | 148 | 0 | 0 | 0 | 0 |
| Total | 153 | 0 | 153 | 0 | 0 | 0 | 0 |

## Australia

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of non-mainstream schools (e.g. special education schools), very small schools (MOS < 5), remote schools, and schools that burned down in Victorian bushfires.
- Within-school exclusions consisted of intellectually and physically disabled students, and English as a second language (ESL) students.

Sample Design

- Explicit stratification by states/territories.
- Implicit stratification by geographic location (metropolitan, provincial, and remote), SEIFA performance index (10), and school type (Catholic, government, and independent).
- Sampled two classrooms per school and all of the indigenous students found in sampled schools.
- Schools were oversampled to allow for better estimates at the state/territory level.
- Student non-response adjustment cells for the indigenous students were built at the explicit stratum level (with no modification to the variance calculation method).
- No overlap between Grade 4 and Grade 8 school samples.
- All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## Exhibit 3: Allocation of School Sample in Australia, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original <br> Schools | 1st <br> Replacements | 2nd Replacements |  |  |
| Australian Capital Territory | 30 | 1 | 29 | 0 | 0 | 0 | 0 |
| New South Wales | 45 | 0 | 40 | 4 | 0 | 1 | 0 |
| Northern Territory | 15 | 0 | 14 | 0 | 0 | 1 | 0 |
| Queensland | 45 | 0 | 44 | 0 | 0 | 1 | 0 |
| South Australia | 40 | 1 | 39 | 0 | 0 | 0 | 0 |
| Tasmania | 30 | 2 | 28 | 0 | 0 | 0 | 0 |
| Victoria | 45 | 2 | 41 | 1 | 0 | 1 | 0 |
| Western Australia | 40 | 0 | 40 | 0 | 0 | 0 | 0 |
| Total | 290 | 6 | 275 | 5 | 0 | 4 | 0 |

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of non-mainstream schools (e.g. special education schools), very small schools (MOS < 5), and remote indigenous schools.
- Within-school exclusions consisted of intellectually disabled students, physically disabled students, and English as a second language (ESL) students.

## Sample Design

- Explicit stratification by states/territories.
- Implicit stratification by geographic location (metropolitan, provincial, and remote), SEIFA performance index (10), and school type (Catholic, government, and independent).
- Sampled two classrooms per school in the ACT and Northern Territory strata and all of the indigenous students found in sampled schools.
- Schools were oversampled to allow for better estimates at the state/territory level.
- Student non-response adjustment cells for the indigenous students were built at the explicit stratum level (with no modification to the variance calculation method).
- No overlap between Grade 4 and Grade 8 school samples.

## Exhibit 4: Allocation of School Sample in Australia, Eighth Grade

| Explicit Strata | Total <br> Sampled <br> Schools | Ineligible <br> Schools | Participating Schools |  |  | Refiginal <br> Schools | 1st <br> Replacements | 2nd <br> Replacements |

| Schools |  |  |  |  |  |  |  |  | | Excluded |
| :---: |
| Schools |

## Austria

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools and very small schools (MOS < 4).
- Within-school exclusions consisted of intellectually-disabled students, functionally-disabled students, non-native language speakers, and students with special needs in special education classrooms in regular schools.

## Sample Design

- Explicit stratification by region (Bundesland).
- Implicit stratification by district (121).
- Sampled two classrooms per school.
- All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## Exhibit 5: Allocation of School Sample in Austria, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{array}{\|c} \text { 1st } \\ \text { Replacements } \end{array}$ | 2nd Replacements |  |  |
| Burgenland | 5 | 0 | 5 | 0 | 0 | 0 | 0 |
| Kärnten | 11 | 0 | 11 | 0 | 0 | 0 | 0 |
| Niederösterreich | 31 | 0 | 31 | 0 | 0 | 0 | 0 |
| Oberösterreich | 29 | 0 | 29 | 0 | 0 | 0 | 0 |
| Salzburg | 11 | 0 | 11 | 0 | 0 | 0 | 0 |
| Steiermark | 22 | 0 | 21 | 0 | 0 | 0 | 1 |
| Tirol | 14 | 0 | 14 | 0 | 0 | 0 | 0 |
| Vorarlberg | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Wien | 29 | 0 | 28 | 0 | 0 | 0 | 1 |
| Total | 160 | 0 | 158 | 0 | 0 | 0 | 2 |

## Azerbaijan

Fourth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools where students are taught in languages other than Azeri or Russian, very small schools (MOS < 5), and special education schools.
- Also excluded were students taught in Armenian community schools in Nagorno-Karabakh conflict zone (due to lack of access, students taught in Azeri community schools were in the sample frame under "refugee schools") and students in international schools (TISA and BAKU) for which no statistics were available. As a result, exclusion rates are biased downward.
- Within-school exclusions consisted of students with special educational needs and students taught in languages other than Azeri or Russian.

Sample Design

- Explicit stratification by national examination score.
- Implicit stratification by geographic sub index (Baku, Baku suburb, refugee school, regional center school, and village school), and performance level on national examination (11). If the national examination score of the school was unknown (missing), the implicit stratification took into account the school type (gymnasium and lyceum, basic and elementary, and secondary school).
- Sampled two classrooms per school.
- All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 6: Allocation of School Sample in Azerbaijan, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Low Performance | 40 | 0 | 26 | 12 | 2 | 0 | 0 |
| Medium Performance | 30 | 0 | 22 | 6 | 2 | 0 | 0 |
| High Performance | 78 | 0 | 74 | 4 | 0 | 0 | 0 |
| Unknown Performance | 22 | 1 | 20 | 1 | 0 | 0 | 0 |
| Total | 170 | 1 | 142 | 23 | 4 | 0 | 0 |

## Bahrain

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 15).
- No within-school exclusions.

Sample Design

- Explicit stratification by school type (public and private), and governorates within public school sector.
- Implicit stratification by school gender within public schools (boys or girls).
- Data collection was delayed until autumn 2011. School data was updated using Grade 5 information.
- Sampled one classroom per school.
- Census of all schools. Schools were used as variance strata when there was only one classroom in the school at the target grade.
- No overlap between the Grade 4 and Grade 8 school samples.

Exhibit 7: Allocation of School Sample in Bahrain, Fourth Grade

| Explicit Strata | Total <br> Sampled <br> Schools | Ineligible <br> Schools | Participating Schools <br> Original <br> Schools |  | 1st <br> Replacements | 2nd <br> Replacements | Refusal <br> Schools | Excluded <br> Schools |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Capital | 18 | 0 | 17 | 0 | 0 | 1 | 0 |  |
| Central | 32 | 0 | 28 | 0 | 0 | 4 | 0 |  |
| Muharraq | 20 | 0 | 18 | 0 | 0 | 2 | 0 |  |
| Northern | 40 | 0 | 37 | 0 | 0 | 3 | 0 |  |
| Private | 53 | 1 | 49 | 0 | 0 | 2 | 1 |  |
| Southern | 11 | 0 | 10 | 0 | 0 | 1 | 0 |  |
| Total | $\mathbf{1 7 4}$ | $\mathbf{1}$ | $\mathbf{1 5 9}$ | $\mathbf{0}$ | $\mathbf{0}$ | $\mathbf{1 3}$ | $\mathbf{1}$ |  |

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 15).
- No within-school exclusions.

## Sample Design

- Explicit stratification by school type (public and private) and governorates within public school sector.
- Implicit stratification by school gender within public schools (boys or girls).
- Data collection was delayed until autumn 2011. School data was updated using Grade 9 information.
- Sampled two classrooms per school.
- Census of all schools. Schools were used as variance strata.
- No overlap between the Grade 4 and Grade 8 school samples.

Exhibit 8: Allocation of School Sample in Bahrain, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Capital | 10 | 0 | 10 | 0 | 0 | 0 | 0 |
| Central | 14 | 0 | 14 | 0 | 0 | 0 | 0 |
| Muharraq | 12 | 0 | 12 | 0 | 0 | 0 | 0 |
| Northern | 15 | 0 | 15 | 0 | 0 | 0 | 0 |
| Private | 38 | 0 | 36 | 0 | 0 | 1 | 1 |
| Southern | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Total | 97 | 0 | 95 | 0 | 0 | 1 | 1 |

## Belgium (Flemish)

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5) and French language schools.
- Within-school exclusions consisted of non-native language speakers and students with disabilities.
- All students from the special education stratum were coded as ineligible as they do not belong to any grade.

## Sample Design

- Explicit stratification by province and school type (private and official).
- Implicit stratification by equal opportunity policy level (low, moderate, high, very high, and unknown).
- Sampled two classrooms per school.

Exhibit 9: Allocation of School Sample in Belgium (Flemish), Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Antwerpen - Official | 17 | 0 | 12 | 2 | 0 | 3 | 0 |
| Antwerpen - Private | 25 | 0 | 16 | 5 | 2 | 2 | 0 |
| Brussels and VlaamsBraban - Official | 14 | 0 | 12 | 2 | 0 | 0 | 0 |
| Brussels and Vlaams- <br> Braban - Private | 15 | 0 | 11 | 4 | 0 | 0 | 0 |
| Limburg - Official | 6 | 0 | 5 | 1 | 0 | 0 | 0 |
| Limburg - Private | 13 | 0 | 10 | 3 | 0 | 0 | 0 |
| Oost-Vlaanderen - Official | 12 | 0 | 9 | 1 | 0 | 2 | 0 |
| Oost-Vlaanderen - Private | 22 | 0 | 15 | 5 | 1 | 1 | 0 |
| West-Vlaanderen - Official | 7 | 0 | 6 | 0 | 1 | 0 | 0 |
| West-Vlaanderen - Private | 19 | 0 | 18 | 1 | 0 | 0 | 0 |
| Total | 150 | 0 | 114 | 24 | 4 | 8 | 0 |

## Botswana

## Sixth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools.
- No within-school exclusions.

## Sample Design

- Explicit stratification by inspectoral region.
- Implicit stratification by performance level (high, medium, low, and unknown).
- The school measure of size (MOS) was given by the number of Grade 4 students found in schools (Grade 4 and Grade 6 students all attend the same schools).
- Sampled one classroom per school.
- School sample overlap between prePIRLS (Grade 4), TIMSS (Grade 6), PIRLS (Grade 6), and TIMSS (Grade 9): 1) Samples were drawn all at once; 2) All sampled schools were asked to participate in all assessments; and 3) All sampled students for TIMSS at Grade 6 also were asked to take PIRLS.

Exhibit 10: Allocation of School Sample in Botswana, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Central North | 25 | 1 | 24 | 0 | 0 | 0 | 0 |
| Central South | 28 | 0 | 28 | 0 | 0 | 0 | 0 |
| North | 14 | 0 | 14 | 0 | 0 | 0 | 0 |
| South | 24 | 0 | 24 | 0 | 0 | 0 | 0 |
| South Central | 43 | 0 | 43 | 0 | 0 | 0 | 0 |
| West | 16 | 0 | 16 | 0 | 0 | 0 | 0 |
| Total | 150 | 1 | 149 | 0 | 0 | 0 | 0 |

## Ninth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- No school-level exclusions.
- Within-school exclusions consisted of students with special needs.

Sample Design

- Explicit stratification by inspectoral region.
- Implicit stratification by performance level (high, medium, low, and unknown).
- The school measure of size (MOS) was given by the number of Grade 8 students found in schools (Grade 8 and Grade 9 students all attend the same school).
- Sampled one classroom per school.
- Overlap was maximized between the Grade 6 and Grade 9 school samples.

Exhibit 11: Allocation of School Sample in Botswana, Ninth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st <br> Replacements | 2nd Replacements |  |  |
| Central | 40 | 0 | 40 | 0 | 0 | 0 | 0 |
| North | 24 | 0 | 24 | 0 | 0 | 0 | 0 |
| South | 24 | 0 | 24 | 0 | 0 | 0 | 0 |
| South Central | 45 | 0 | 45 | 0 | 0 | 0 | 0 |
| West | 17 | 0 | 17 | 0 | 0 | 0 | 0 |
| Total | 150 | 0 | 150 | 0 | 0 | 0 | 0 |

## Chile

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools with mixed grade classes, special education schools, very small schools (MOS < 6), and schools difficult to access for geographic reasons.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by school administration and "Grade 4" / "Grade 4 \& Grade 8 " school type.
- Implicit stratification by achievement categories (14) and urban/rural school status (2).
- Sampled one classroom per school.
- School sample overlap between TIMSS (Grade 4) and TIMSS (Grade 8):

1) Samples were drawn all at once; and 2) All sampled schools in the "Grade 4 \& Grade 8" stratum were asked to participate in both studies.

Exhibit 12: Allocation of School Sample in Chile, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd <br> Replacements |  |  |
| Grade 4 only - Public (Municipal) | 4 | 0 | 4 | 0 | 0 | 0 | 0 |
| Grade 4 only - Private Subsidized | 8 | 0 | 5 | 3 | 0 | 0 | 0 |
| Grade 4 only - Private Paid | 2 | 0 | 1 | 0 | 1 | 0 | 0 |
| Grade 4 \& Grade 8 - Public (Municipal) | 75 | 0 | 63 | 9 | 2 | 1 | 0 |
| Grade 4 \& Grade 8 - <br> Private Subsidized | 76 | 0 | 70 | 6 | 0 | 0 | 0 |
| Grade 4 \& Grade 8 Private Paid | 38 | 0 | 26 | 8 | 2 | 1 | 1 |
| Total | 203 | 0 | 169 | 26 | 5 | 2 | 1 |

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools with mixed grade classes, special education schools, very small schools (MOS < 10), and schools difficult to access for geographic reasons.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by school administration and "Grade 8" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by achievement categories (14) and urban/rural school status.
- Sampled one classroom per school.
- Maximum possible overlap between the Grade 4 and Grade 8 school samples (see Grade 4 above).

Exhibit 13: Allocation of School Sample in Chile, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd <br> Replacements |  |  |
| Grade 8 only - Public (Municipal) | 4 | 1 | 3 | 0 | 0 | 0 | 0 |
| Grade 8 only - Private Subsidized | 2 | 0 | 2 | 0 | 0 | 0 | 0 |
| Grade 8 only - Private Paid | 2 | 0 | 0 | 0 | 1 | 1 | 0 |

| Total | 197 | 1 | 166 | 23 | 4 | 3 | 0 |

## Chinese Taipei

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special needs schools and schools severely damaged in typhoon Mokrak.
- No within-school exclusions.

## Sample Design

- Explicit stratification by region.
- No implicit stratification.
- Sampled two classrooms in large schools (more than 18 classrooms in school).
- No overlap between the Grade 4 and Grade 8 school samples.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; 2) All sampled schools for TIMSS were asked to participate in PIRLS; and 3) All sampled students for TIMSS also were asked to take PIRLS.

Exhibit 14: Allocation of School Sample in Chinese Taipei, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| North | 66 | 0 | 66 | 0 | 0 | 0 | 0 |

| Total | 150 | 0 | 150 | 0 | 0 | 0 | 0 |

Eighth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special needs schools and schools severely damaged in typhoon Mokrak.
- No within-school exclusions.

## Sample Design

- Explicit stratification by region.
- Implicit stratification by achievement score level (8).
- Sampled one classroom per school.
- No overlap between the Grade 4 and Grade 8 school samples.

Exhibit15: Allocation of School Sample in Chinese Taipei, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| East | 4 | 0 | 4 | 0 | 0 | 0 | 0 |
| Isolated Islands | 2 | 0 | 2 | 0 | 0 | 0 | 0 |
| Total | 150 | 0 | 150 | 0 | 0 | 0 | 0 |

## Croatia

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 6), hospital schools, schools for minority groups (language and writing, and models A and B), schools in which the majority of the classes are composed of solely Roma children, and private elementary schools.
- Within-school exclusions consisted of students with special needs and special program teaching.

## Sample Design

- Explicit stratification by school type.
- Implicit stratification by region (Središnja, Istocna, Sjeverna, Zapadna, Južna, and Zagreb) or area (21).
- Sampled two classrooms in large schools in the "One Building School" stratum (MOS $>90$ ) and sampled two classrooms in each sampled school in the "Multiple Building School" and "Minority School" strata.
- Satellite schools of mother schools were treated as classrooms of the mother school for purposes of sampling.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; 2) All sampled schools for TIMSS were asked to participate in PIRLS; and 3) All sampled students for TIMSS also were asked to take PIRLS.

Exhibit 16: Allocation of School Sample in Croatia, Fourth Grade

| Explicit Strata | Total <br> Sampled <br> Schools | Ineligible <br> Schools | Priginal <br> Ochools |  |  | 1st <br> Replacements | 2nd <br> Replacements | Refusal <br> Schools |

| Multiple Building School | 91 | 0 | 91 | 0 | 0 | 0 | 0 |  |
| Minority School | 2 | 0 | 2 | 0 | 0 | 0 | 0 |  |
| Total | $\mathbf{1 5 2}$ | $\mathbf{0}$ | $\mathbf{1 5 0}$ | $\mathbf{2}$ | $\mathbf{0}$ | $\mathbf{0}$ | $\mathbf{0}$ |  |

## Czech Republic

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools, Polish language schools, and very small schools (MOS < 3 in Grade 4).
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by extended education status.
- Implicit stratification by region (14).
- Sampled two classrooms in the "extended education of languages" stratum. All variance estimates from this stratum were derived using schools as variance strata.
- Oversampling of the "extended education of languages" stratum.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; 2) All sampled schools for TIMSS were asked to participate in PIRLS; and 3) All sampled students for TIMSS also were asked to take PIRLS.

Exhibit 17: Allocation of School Sample in Czech Republic, Fourth Grade

## Denmark

Fourth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5), special education schools, out-of-school, and residential institutions.
- Within-school exclusions consisted of students with special educational needs.

Sample Design

- Explicit stratification by public/private status.
- No implicit stratification.
- Sampled one classroom per school in most schools.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; and 2) No school sample overlap between TIMSS and PIRLS.

Exhibit 18: Allocation of School Sample in Denmark, Fourth Grade

## England

Fourth Grade (Year 5)
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special schools and very small schools (MOS < 8).
- Within-school exclusions consisted of students with significant special educational needs.

Sample Design

- Explicit stratification by "Year 5" / "Year 5 \& Year 9" schools.
- Implicit stratification by attainment level (low, low to medium, medium, medium to high, high, and unknown) and school type (primary, junior, middle, independent, and unknown).
- Sampled two classrooms in large schools (MOS > 85).
- Response adjustment cells were built using attainment status.
- School sample overlap between TIMSS (Year 5), PIRLS, and TIMSS (Year 9): 1) Samples were drawn all at once; and 2) No school sample overlap between these three studies.

Exhibit 19: Allocation of School Sample in England, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1 st Replacements | 2nd Replacements |  |  |
| Year 5 only | 146 | 0 | 119 | 3 | 0 | 24 | 0 |
| Year 5 \& Year 9 | 4 | 0 | 3 | 0 | 0 | 1 | 0 |
| Total | 150 | 0 | 122 | 3 | 0 | 25 | 0 |

## Eighth Grade (Year 9)

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special schools and very small schools (MOS < 8).
- Within-school exclusions consisted of students with significant special educational needs.

Sample Design

- Explicit stratification by "Year 5" / "Year 5 \& Year 9" schools.
- Implicit stratification by attainment level (low, low to medium, medium, medium to high, high, and unknown) and school type (comprehensive to 16 , comprehensive to 18 , independent, and other).
- Sampled two classrooms in large schools (MOS > 200).
- Response adjustment cells were built using attainment status.
- School sample overlap between TIMSS (Year 5), PIRLS, and TIMSS (Year 9): 1) Samples were drawn all at once; and 2) No school sample overlap between these three studies.

Exhibit 20: Allocation of School Sample in England, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Year 5 \& Year 9 | 7 | 0 | 5 | 0 | 0 | 2 | 0 |
| Total | 150 | 0 | 113 | 4 | 1 | 32 | 0 |

## Finland

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools and language schools (instructional language not Finnish or Swedish).
- Within-school exclusions consisted of students with dyslexia or other severe linguistic disorders, intellectually disabled students, functionally disabled students, and students with limited proficiency in the assessment language.

## Sample Design

- Explicit stratification by major region, and urban \& semi-urban/rural status.
- No implicit stratification.
- Sampled two classrooms per school.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; 2) All sampled schools for TIMSS were asked to participate in PIRLS; and 3) All sampled students for TIMSS also were asked to take PIRLS.

| Total | 150 | 4 | 141 | 4 | 0 | 1 | 0 |

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools for students with special needs and language schools (instructional language not Finnish or Swedish).
- Within-school exclusions consisted of intellectually disabled students, functionally disabled students, and students with limited proficiency in test language.

Sample Design

- Explicit stratification by major region, and urban \& semi-urban/rural status.
- No implicit stratification.
- Sampled two classrooms in large schools (MOS > 114).
- Grade 4 and Grade 8 were sampled independently without controlling for overlap.

Exhibit 22: Allocation of School Sample in Finland, Eighth Grade

## Seventh Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools for students with special needs and language schools (instructional language not Finnish or Swedish).
- Within-school exclusions consisted of intellectually disabled students, functionally disabled students, and students with limited proficiency in the assessment language.

Sample Design

- Explicit stratification by major region, and urban \& semi-urban/rural status.
- No implicit stratification.
- Sampled two classrooms in large schools (MOS > 114).
- Sampled every second elected school in Grade 8.
- Grade 4 and Grade 7 were sampled independently without controlling for overlap.

Exhibit 23: Allocation of School Sample in Finland, Seventh Grade

| Explicit Strata | Total <br> Sampled <br> Schools | Ineligible <br> Schools | Priginal <br> Schools | 1st <br> Replacements | 2nd <br> Replacements | Refusal <br> Schools | Excluded <br> Schools |

| Swedish Speaking - Rural | 1 | 0 | 1 | 0 | 0 | 0 | 0 |
| Total | $\mathbf{7 5}$ | $\mathbf{1}$ | $\mathbf{7 2}$ | $\mathbf{2}$ | $\mathbf{0}$ | $\mathbf{0}$ | $\mathbf{0}$ |

## Georgia

## Fourth Grade

Coverage and Exclusions

- Coverage is 91 percent. Coverage in Georgia was restricted to students whose language of instruction is Georgian ( $91 \%$ of the international target population).
- School-level exclusions consisted of special needs schools and very small schools (MOS $<4$ ). Schools from South Ossetia were also excluded along with schools from Abkhazia (no physical access and no official statistics). However, Abkhazia refugee schools functioning in other territories of Georgia were part of the sample frame. As a result, exclusion rates are biased downward.
- Within-school exclusions consisted of specialized schools for disabled students.

## Sample Design

- Explicit stratification by region and "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by state/private status, and highland/town/village status.
- Sampled two classrooms in large schools (MOS > 50).
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 \& Grade 8 " stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 24: Allocation of School Sample between Studies in Georgia

| Explicit Strata | Total Sampled Schools | Allocation of Schools |  |  |
| :---: | :---: | :---: | :---: | :---: |

## Eighth Grade

Coverage and Exclusions

- Coverage is 93 percent. Coverage in Georgia was restricted to students whose language of instruction is Georgian ( $93 \%$ of the international target population).
- School-level exclusions consisted of special needs schools and very small schools (MOS < 4). Schools from South Ossetia were also excluded along with schools from Abkhazia (no physical access, and no official statistics). However, Abkhazia refugee schools functioning in other territories of Georgia were part of the sample frame. As a result, exclusion rates are biased downward.
- Within-school exclusions consisted of specialized schools for disabled students.

Sample Design.

- Explicit stratification by region and "Grade 8" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by state/private status, and highland/town/village status.
- Sampled two classrooms in large schools (MOS > 100).
- Maximum possible overlap between the Grade 4 and Grade 8 school samples (see Grade 4 above).

Exhibit 26: Allocation of School Sample in Georgia, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Germany

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools for children with special needs (mentally disabled, physically disabled, visual impairment, hearing impairment, autism, and long-term sickness).
- Within-school exclusions consisted of children with special needs in regular schools.

## Sample Design

- Explicit stratification by federal state.
- Implicit stratification by regional subdivision (30), and school type (Grundschule, Freie Waldorfschule, and Förderschule).
- Sampled one classroom per school.
- School sample overlap between PIRLS and TIMSS (Grade 4): 1) Samples were drawn all at once; and 2) All sampled students for TIMSS also were asked to take PIRLS.

## Exhibit 27: Allocation of School Sample in Germany, Fourth Grade

## Ghana

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools, and small schools (MOS < 10).
- No within-school exclusions.

Sample Design

- Explicit stratification by public/private school type.
- Implicit stratification by region.
- Sampled one classroom per school.
- Oversampling of schools in the private sector.

Exhibit 28: Allocation of School Sample in Ghana, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Private | 30 | 1 | 29 | 0 | 0 | 0 | 0 |

| Total | 163 | 2 | 161 | 0 | 0 | 0 | 0 |

## Honduras

Sixth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5), and schools with different curriculum/schedule.
- No within-school exclusions.

## Sample Design

- Explicit stratification by "Grade 6" / "Grade 6 \& Grade 9" schools, public/private status, and urban/rural status.
- Implicit stratification by school type (municipal, official, urban, rural, and semi-public), geographic area (18), and urban/private status.
- Sampled two classrooms per school in large schools (MOS > 125).
- The school measure of size (MOS) was given by the number of Grade 4 students found in schools (Grade 4 and Grade 6 students all attended the same schools).
- School sample overlap between TIMSS (Grade 6), PIRLS, and TIMSS (Grade 9): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 6 \& Grade 9" stratum were asked to participate in TIMSS at Grade 9 (a subset of these schools also were asked to participate in both TIMSS at Grade 6 and PIRLS); and 3) All sampled students for TIMSS at Grade 6 also were asked to take PIRLS.

## Ninth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5), and schools with different curriculum/schedule.
- No within-school exclusions.

## Sample Design

- Explicit stratification by "Grade 9" / "Grade 6 \& Grade 9" school status, public/private status, and urban/rural status.
- Implicit stratification by school type (municipal, official, urban, rural, and semi-public), geographic area (18), and urban/private status.
- Sampled one classroom per school.
- The school measure of size (MOS) was obtained by the number of Grade 8 students found in schools (Grade 8 and Grade 9 students all attended the same schools).
- Overlap was maximized between the Grade 6 and Grade 9 school samples (see Grade 6 above).

Exhibit 31: Allocation of School Sample in Honduras, Ninth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Hong Kong

Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of international schools, special schools, and schools with different curriculum.
- Within-school exclusions consisted of students with special educational needs under an inclusive education scheme.

## Sample Design

- Explicit stratification by school type and session (am/pm/day).
- Implicit stratification by school gender (boys, co-educational, or girls).
- Sampled one classroom per school.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; 2) All sampled schools for TIMSS also were sampled for PIRLS; and 3) All sampled students for TIMSS also were asked to take PIRLS.

Exhibit 32: Allocation of School Sample in Hong Kong, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{array}{\|c} \text { 1st } \\ \text { Replacements } \end{array}$ | $\qquad$ |  |  |
| Aided - Whole day | 117 | 0 | 105 | 2 | 0 | 10 | 0 |

| Private | 9 | 0 | 7 | 0 | 0 | 2 | 0 |
| Non-native Language | 4 | 0 | 4 | 0 | 0 | 0 | 0 |
| Total | 154 | 0 | 134 | 2 | 0 | 18 | 0 |

Eighth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of international schools, special schools, and private independent schools.
- Within-school exclusions consisted of students with special educational needs under inclusive education scheme.

## Sample Design

- Explicit stratification by school type.
- Implicit stratification by school gender (boys, co-educational, or girls) and school banding.
- Sampled one classroom per school.
- No overlap between the Grade 4 and Grade 8 school samples.

Exhibit 33: Allocation of School Sample in Hong Kong, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |

| Total | 150 | 0 | 116 | 1 | 0 | 33 | 0 |

## Hungary

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special schools for students with special educational needs, very small schools (MOS $<5$ in both Grade 4 and Grade 8), and students taught in a foreign language.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by type of community, and "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by geographic region (Del-Alfold, Del-Dunantul, Kozep-Dunantul, Kozep-Magyarorszag, Nyugat-Dunantul, Eszak-Alfold, and Eszak-Magyarorszag).
- Sampled two classrooms per school.
- School sample overlapped between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 \& Grade 8" stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 34: Allocation of the School Sample between Studies in Hungary

| Explicit Strata | Total Sampled Schools | Allocation of Schools |  |  |

## Indonesia

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools in Papua and Papua Barat (geographic reasons), very small schools (MOS $<6$ ), and open schedule secondary schools (informal secondary school).
- No within-school exclusions.

## Sample Design

- Explicit stratification by public/private school type, and general/Islamic school status.
- Implicit stratification by school performance (high, medium, and low), and province (31)
- Sampled two classrooms in large schools (MOS > 280).

Exhibit 37: Allocation of School Sample in Indonesia, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

| Total | 154 | 1 | 153 | 0 | 0 | 0 | 0 |

## Iran, Islamic Republic of

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 4) and schools geographically difficult to access.
- No within-school exclusions.

## Sample Design

- No explicit stratification.
- Implicit stratification by province (31), public/private status, and school gender (boys, co-educational, or girls).
- Sampled one classroom per school.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; 2) All sampled schools for TIMSS also were sampled for PIRLS; and 3) All sampled students for TIMSS also were asked to take PIRLS.

Exhibit 38: Allocation of School Sample in Iran, Fourth Grade

| Total | 250 | 12 | 237 | 1 | 0 | 0 | 0 |

## Ireland

Fourth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of non-aided first level educational institutions (private schools), and students in special schools (students with special educational needs).
- Within-school exclusions consisted of students with special educational needs.

Sample Design

- Explicit stratification by school size.
- Implicit stratification by school-level socio-economic status (DEIS1, DEIS2, rural, and "other"), language status (Irish, Gaeltacht, and English), and school gender (boys, co-educational, or girls).
- Sampled two classrooms per school.
- The school sample for TIMSS was selected by controlling for the overlap between three studies using the Chowdhury approach (samples drawn sequentially). The TIMSS sample of schools was selected by minimizing the overlap with the samples from the previous TIMSS/PIRLS field test and the samples were drawn for a national study. Note that these two previous samples were drawn independently from each other.
- All sampled students from schools selected for TIMSS were asked to participate in PIRLS.

Exhibit 40: Allocation of School Sample in Ireland, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Small Enrollment | 45 | 0 | 44 | 0 | 0 | 1 | 0 |
| Medium Enrollment | 41 | 0 | 40 | 1 | 0 | 0 | 0 |
| Large Enrollment | 64 | 0 | 62 | 2 | 0 | 0 | 0 |
| Total | 152 | 1 | 147 | 3 | 0 | 1 | 0 |

## Israel

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of Ultra Orthodox schools, special education schools, very small schools (MOS $<5$ ), and schools where instruction is in English or French.
- Within-school exclusions consisted of classes for students with special educational needs in regular schools and students with special educational needs learning in regular classes.

Sample Design

- Explicit stratification by "Grade 8" / "Grade 4 \& Grade 8" school status, and school orientation.
- Implicit stratification by socio-economic status (SES) (high, medium, and low), school gender (boys, co-educational, or girls), and geographic region (North and South).
- Sampled two classrooms per school in large schools (MOS > 280).
- There was one census stratum ("Grade 4 \& Grade 8 - Arabic Druze"). All variance estimates for this stratum were derived using schools as variance strata.
- School sample overlap between PIRLS and TIMSS (Grade 8): 1) Samples were drawn all at once; and 2) Only two of the sampled schools in the "Grade 4 \& Grade 8 " stratum were asked to participate in both TIMSS at Grade 8 and PIRLS.

## Italy

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of students taught in Slovenian and very small schools (MOS < 5).
- Within-school exclusions consisted of intellectually and functionally disabled students, and non-native language speakers.

## Sample Design

- Explicit stratification by geographic area, and "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by public/private status, and by region or province (104).
- Sampled two classrooms in large schools (MOS > 150).
- Oversampling as follows: 40 schools selected per region to allow comparison between the five main regions (Northeast, Northwest, Central, South, and Southern Islands) plus additional sampling for sub-regions (Trento \& Bolzano, and Valle D'Aosta).
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 \& Grade 8" stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## Jordan

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- No school-level exclusions.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by school type.
- Implicit stratification by performance level (7), governorate (12), urban/rural school status, and school gender (boys, co-educational, or girls).
- Sampled one classroom per school in all strata except the "USAID" stratum. In the "USAID" stratum, all schools sampled had at least two or all classrooms selected per school. Variance in the "USAID" stratum was computed using schools as variance strata.
- Schools were oversampled (minimum of 25 sampled schools per stratum) to allow for better estimates of each school type.

Exhibit 48: Allocation of School Sample in Jordan, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Kazakhstan

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools with all instruction in language other than Kazakh or Russian, very small schools (MOS $<4$ ), and remedial schools.
- Within-school exclusions consisted of students taught in languages other than Kazakh or Russian in mixed schools (i.e., schools where some students were taught in languages other than Kazakh or Russian).

## Sample Design

- Explicit stratification by region, and "Grade 4" / "Grade 4 \& Grade 8" school types.
- Implicit stratification by urban/rural school status, language of instruction (Kazakh, Russian, or both), ISCED level (basic, primary, and secondary), and school performance level (high, medium, low, and unknown).
- Sampled two classrooms per school in large schools (MOS > 77).
- Overlap was maximized between the Grade 4 and Grade 8 school samples.

Exhibit 49: Allocation of School Sample in Kazakhstan, Fourth Grade

## Korea

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of geographically inaccessible schools (islands and remote places), and very small schools (MOS < 5).
- Within-school exclusions consisted of intellectually or functionally disabled students.

Sample Design

- Explicit stratification by province.
- Implicit stratification by urbanization (urban, suburban, and rural).
- Sampled one classroom per school.
- No overlap between the Grade 4 and Grade 8 school samples.

Exhibit 51: Allocation of School Sample in Korea, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of geographically inaccessible schools (island and remote places), the Physical Education Middle School (different curriculum), and very small schools (MOS < 5).
- Within-school exclusions consisted of intellectually or functionally disabled students.

## Sample Design

- Explicit stratification by province.
- Implicit stratification by urbanization (urban, suburban, and rural) and school gender (boys, co-educational, or girls).
- Sampled one classroom per school.
- No overlap between the Grade 4 and Grade 8 school samples.

Exhibit 52: Allocation of School Sample in Korea, Eighth Grade

## Kuwait

## Fourth Grade

Coverage and Exclusions

- Coverage is 78 percent. Coverage in Kuwait was restricted to students in public schools ( $78 \%$ of the international target population).
- School-level exclusions consisted of special needs schools.
- No within-school exclusions.

Sample Design

- Explicit stratification by region.
- Implicit stratification by school gender (boys or girls).
- Sampled two classrooms per school in large schools (MOS > 143).

Exhibit 53: Allocation of School Sample in Kuwait, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Lebanon

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 9).
- No within-school exclusions.

## Sample Design

- Explicit stratification by performance level, and private/public school status.
- Implicit stratification by region (Beirut, Bekaa, Mont Liban, Mont Liban (suburbs), Nabayieh, North, and South).
- Sampled two classrooms in large schools (MOS > 110).

Exhibit 54: Allocation of School Sample in Lebanon, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| High performance Private | 96 | 0 | 84 | 9 | 1 | 2 | 0 |
| High performance - Public | 48 | 0 | 47 | 1 | 0 | 0 | 0 |
| Low Performance | 6 | 0 | 5 | 0 | 0 | 1 | 0 |
| Total | 150 | 0 | 136 | 10 | 1 | 3 | 0 |

## Lithuania

## Fourth Grade

Coverage and Exclusions

- Coverage is 93 percent. Coverage in Lithuania was restricted to students whose language of instruction is Lithuanian (93\% of the international target population).
- School-level exclusions consisted of very small schools and special schools.
- Within-school exclusions consisted of intellectually disabled students.

## Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" schools status, and school location.
- Implicit stratification by school type (primary, primary \& Kindergarten, private, basic, secondary, and gymnasium).
- Sampled two classrooms in large schools (MOS > 50).
- A national booklet was used (resulting in one less international booklet).

A larger sample size was required to compensate for the loss.

- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 \& Grade 8" stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 55: Allocation of the School Sample between Studies in Lithuania

| Explicit Strata | Total Sampled Schools | Allocation of Schools |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | To PIRLS Grade 4 | To TIMSS Grade 4 | To TIMSS Grade 8 |
| Grade 4 only | 39 | 39 | 39 | 0 |
| Grade 4 \& Grade 8 | 121 | 121 | 121 | 121 |
| Grade 8 only | 29 | 0 | 0 | 29 |
| Total | 189 | 160 | 160 | 150 |

| Total | 150 | 7 | 132 | 8 | 1 | 1 | 1 |

## Macedonia

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 7), special primary schools, and schools with instruction solely in languages other than Macedonian/Albanian (schools with instruction in Turkish, Bosnian, or Serbian).
- Within-school exclusions consisted of classes where the language of instruction was not Macedonian/Albanian (instruction was in Turkish,

Bosnian, or Serbian). Because these students were not listed during data collection, they are included with the school-level exclusion rates in the publications.

## Sample Design

- Explicit stratification by language.
- Implicit stratification by urban/rural school type.
- Sampled two classrooms per school in large schools (MOS > 150) of the first two strata (see table below), and one classroom per school from each language in the three other strata.
- There were some certainty schools. These schools were treated as strata when computing variance estimates when more than one classroom was selected.

Exhibit 58: Allocation of School Sample in Macedonia, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded <br> Schools |

## Malta

Fourth Grade (English - Year 5)
Coverage and Exclusions

- Coverage is 100 percent.
- No school-level exclusions.
- No within-school exclusions.

## Sample Design

- No explicit stratification.
- Implicit stratification by Malta/Gozo location, and school type (church, independent, and state).
- Census of all students. All variance estimates were derived using classrooms as variance strata.

Exhibit 60: Allocation of School Sample in Malta (English), Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |

## Morocco

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 6).
- No within-school exclusions.

## Sample Design

- Explicit stratification by public/private status, and superior region.
- Implicit stratification by urban/rural status, and school type (10).
- The 16 original regions were grouped into ten superior regions: Region

1-Guelmim-Es Semara, Laâyoune-Boujdour-Sakia Al Hamra, and Oued-Eddahab - Lagouira; Region 2-Souss Massa-Draâ; Region 3Grand Casablanca; Region 4-Marrakesh-Tensift-Al Haouz; Region 5-Rabat-Sale-Zemmour-Zaër; Region 6-Fez-Boulemane; Region 7-Meknes-Tafilalet; Region 8-Gharb-Chrarda-Bni Hsen, and TangierTetouan; Region 9-Chaouia-Ouardigha, Doukkala-Abda, and TadlaAzilal; and Region 10-the Oriental and Taza-Taounate-Al Hoceima.

- Sampled one classroom per school.
- Oversampling to allow for reliable estimates at the regional level.
- All sampled students for TIMSS at Grade 4 also were asked to take PIRLS at Grade 4.
- No overlap between the Grade 4 and Grade 8 school samples.

Exhibit 61: Allocation of School Sample in Morocco, Fourth Grade

Eighth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 10).
- No within-school exclusions.

Sample Design

- Explicit stratification by public/private status, and superior region.
- Implicit stratification by urban/rural status, and school type (12).
- The 16 original regions were grouped into ten superior regions: Region 1-Guelmim-Es Semara, Laâyoune-Boujdour-Sakia Al Hamra, and Oued-Eddahab - Lagouira; Region 2-Souss Massa-Draâ; Region 3Grand Casablanca; Region 4-Marrakesh-Tensift-Al Haouz; Region 5-Rabat-Sale-Zemmour-Zaër; Region 6-Fez-Boulemane; Region 7-Meknes-Tafilalet; Region 8-Gharb-Chrarda-Bni Hsen, and TangierTetouan; Region 9-Chaouia-Ouardigha, Doukkala-Abda, and TadlaAzilal; and Region 10-the Oriental and Taza-Taounate-Al Hoceima.
- Sampled one classroom per school.
- Oversampling to allow for reliable estimates at the regional level.
- No overlap between the Grade 4 and Grade 8 school samples.

| Total | 285 | 5 | 279 | 0 | 0 | 1 | 0 |

## The Netherlands

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools for special education, and very small schools (MOS < 7).
- Within-school exclusions consisted of non-native language speakers (less than one year of instruction in Dutch) and children who are officially diagnosed as severe dyslectic.

## Sample Design

- Explicit stratification by socio-economic (SES) level. The SES levels differ between the TIMSS and the PIRLS studies. Because sample overlap was controlled, distinct SES levels were maintained.
- Implicit stratification by urbanization (very high, high, moderate, low, and very low), and school size (large and small).
- Sampled all classrooms in selected schools.
- Given that school nonresponse was mainly found in large schools, the nonresponse adjustment was conducted using the expected counts of students not participating rather than using the counts of schools not participating. Variance calculation is slightly biased as a result.
- Schools were selected with equal probabilities.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; and 2) No sample overlap between these studies.

Exhibit 63: Allocation of School Sample in the Netherlands, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| High to Medium Mean SES | 38 | 0 | 18 | 7 | 8 | 5 | 0 |
| Medium Mean SES | 27 | 0 | 9 | 9 | 6 | 3 | 0 |
| Medium to Low Mean SES | 27 | 2 | 15 | 6 | 0 | 4 | 0 |
| Low Mean SES | 12 | 1 | 5 | 2 | 2 | 2 | 0 |
| Total | 151 | 3 | 75 | 32 | 21 | 20 | 0 |

## New Zealand

## Fourth Grade (Year 5)

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of Level 1 Maori language immersion schools, the Correspondence School, special education schools, the Westmount School (Closed Brethren), Maori-medium Level 2 immersion schools, and very small schools (MOS $<4$ ).
- Within-school exclusions consisted of students with insufficient years of instruction in English, students who receive 50 percent or less of their instruction in English (includes Level 1 and 2 immersion Maori-medium units and Level 1 Pacifica immersion language units), and special needs students (class level and within class).

Sample Design

- Explicit stratification by language of instruction, "Grade 4" / "Grade 4 \& Grade 8" school type, and school size.
- Implicit stratification by socio-economic status indicator (very high, high, moderate, low, and very low), school gender (boys, co-educational, or girls), and major urban/other school status.
- Sampled two classrooms in large schools (the rule varies from one stratum to the next).
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; and 2) No school sample overlap between these studies.

Exhibit 64: Allocation of the School Sample between Studies in New Zealand

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of the Westmount School (Closed Bretheren), the Correspondence School, special education schools, Maori-medium Levels 1 and 2 immersion schools, and very small schools (MOS < 7).
- Within-school exclusions consisted of students with insufficient years of instruction in English, students who receive 50 percent or less of their instruction in English (includes Level 1 and 2 immersion Maori-medium units and Level 1 Pacifica immersion language units), and special needs students (class level and within class).

## Sample Design

- Explicit stratification by language of instruction, "Grade 8" / "Grade 4 \& Grade 8" school type, and school size.
- Implicit stratification by socio-economic status indicator (very high, high, moderate, low, and very low), school gender (boys, co-educational, or girls), and major urban/other school status.
- Sampled two classrooms in large schools (number of classrooms larger than 5).
- No school overlap between the Grade 4 and Grade 8 school samples.

Exhibit 66: Allocation of School Sample in New Zealand, Eighth Grade

## Northern Ireland

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools and special schools.
- Within-school exclusions consisted of students with significant special educational needs.

## Sample Design

- Explicit stratification by region.
- Implicit stratification by deprivation level (high, moderate to high, moderate, low to moderate, and low).
- Based on previous national study results, the risk of bias due to low school participation rate (based on the originally selected schools) is believed to be low (study results can be seen as representative of the population).
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; and 2) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 67: Allocation of School Sample in Northern Ireland, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Norway

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of international schools, schools where students are taught in Sami language, and very small schools (MOS $<3$ ).
- No within-school exclusions.

## Sample Design

- Explicit stratification by "Bokmål" / "Nynorsk or other" status, and "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by community size (small, medium, large, and very large).
- Sampled two classrooms per school.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) No school sample overlap between TIMSS at Grade 4 and the Grade 8 studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 68: Allocation of the School Sample between Studies in Norway

| Explicit Strata | Total Sampled Schools | Allocation of Schools |  |  |
| :---: | :---: | :---: | :---: | :---: |

| Total | 150 | 4 | 84 | 23 | 12 | 26 | 1 |

Fifth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS $<3$ in Grade 4), schools where students are taught in Sami language, and international schools.
- No within-school exclusions.

## Exhibit 70: Allocation of School Sample in Norway, Fifth Grade

$\left.\begin{array}{lc|c|c|c|c|c|c} & \text { Total } \\ \text { Explicit Strata } \\ \text { Sampled } \\ \text { Schools }\end{array}\right)$

Eighth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 3), students taught in Sami language, and international schools.
- Within-school exclusions consisted of students in special needs education.

Sample Design

- Explicit stratification by "Bokmål" / "Nynorsk or other" status, and "Grade 8" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by community size (small, medium, large, and very large).
- Sampled two classrooms in large schools (MOS > 130).
- No overlap between the Grade 4 and Grade 8 school samples (see Grade 4 above).

Exhibit 71: Allocation of School Sample in Norway, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total | 150 | 0 | 134 | 0 | 0 | 16 | 0 |

## Oman

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools and very small schools (MOS < 10).
- No within-school exclusions.

Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school status, region, and school type (integrated curriculum, international, private, and public).
- Implicit stratification by urban/rural status, and school gender (boys, co-educational, or girls).
- There were census strata along with certainty schools outside these strata. Two classrooms per school were sampled in these schools. All variance estimates were computed using schools as variance strata.
- Census of all students in the first two explicit strata. All variance estimates were computed using classrooms as variance strata.
- Oversampling to allow for better estimates at the regional level.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) Overlap was maximized between all studies for schools selected from the "Grade 4 \& Grade 8" stratum; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 72: Allocation of the School Sample between Studies in Oman

## Palestinian National Authority

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 11), special education schools, and students taught in English.
- No within-school exclusions.

## Sample Design

- Explicit stratification by school gender, school type, and school group.
- Implicit stratification by educational districts (22). Implicit stratification by school gender (boys, co-educational, or girls) also was used in all explicit strata except those with the "regular-public" strata combination.
- Sampled two classrooms per school.
- Census of all schools in strata "pilot" and "MSN-GOV". Variance estimates were computed treating these schools as variance strata.
- Oversampling to allow for better estimates at the school group level (regular, pilot, and MSN).

Exhibit 75: Allocation of School Sample in the Palestinian National Authority, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original <br> Schools | 1st <br> Replacements | 2nd <br> Replacements |  |  |
| Regular - Public - Boys | 42 | 0 | 42 | 0 | 0 | 0 | 0 |
| Regular - Public - Girls | 40 | 0 | 40 | 0 | 0 | 0 | 0 |
| Regular - Public - Coed | 9 | 0 | 9 | 0 | 0 | 0 | 0 |
| Regular - UNWRA | 40 | 0 | 40 | 0 | 0 | 0 | 0 |
| Regular - Private | 7 | 0 | 6 | 0 | 0 | 0 | 1 |
| Pilot schools | 22 | 0 | 22 | 0 | 0 | 0 | 0 |
| Model Schools Network (MSN) | 43 | 0 | 42 | 0 | 0 | 0 | 1 |
| Total | 203 | 0 | 201 | 0 | 0 | 0 | 2 |

## Poland

## Fourth Grade (Standard 3)

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5) and special schools.
- Within-school exclusions consisted of special needs students in regular classrooms.

## Sample Design

- Explicit stratification by urbanization.
- Implicit stratification by districts (voivodship) (16).
- Sampled two classrooms per school.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; and 2) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 76: Allocation of School Sample in Poland, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Village | 61 | 0 | 61 | 0 | 0 | 0 | 0 |
| Town (up to 20 thousand inhabitants) | 24 | 0 | 24 | 0 | 0 | 0 | 0 |
| City (20 to 100 thousand inhabitants) | 29 | 0 | 29 | 0 | 0 | 0 | 0 |
| City (above 100 thousand inhabitants) | 36 | 0 | 36 | 0 | 0 | 0 | 0 |
| Total | 150 | 0 | 150 | 0 | 0 | 0 | 0 |

## Portugal

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of extremely small schools (MOS < 5).
- Within-school exclusions consisted of students with special educational needs, and non-native language speakers.

## Sample Design

- Explicit stratification by public/private status.
- Implicit stratification by region (12).
- Sampled two classrooms per school.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; and 2) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 77: Allocation of School Sample in Portugal, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Private | 16 | 0 | 13 | 2 | 0 | 1 | 0 |
| Public | 134 | 0 | 119 | 11 | 2 | 2 | 0 |
| Total | 150 | 0 | 132 | 13 | 2 | 3 | 0 |

## Qatar

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools that provide instruction in languages other than English and Arabic.
- No within-school exclusions.
- Private (from the "Grade 4 \& Grade 8" explicit stratum in the co-educational schools) and community schools were not part of previous cycles.

Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by school gender (boys, co-educational, or girls), and school type (community, independent, and private).
- Sampled two classrooms per school in large schools (MOS > 150).
- Census of all schools. Variance estimates were computed using schools as variance strata for schools where at least two classrooms or all classrooms were sampled.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 \& Grade 8" stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## The Russian Federation

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools and special needs schools.
- Within-school exclusions consisted of disabled students.

## Sample Design

- Explicit stratification by very large regions. There were 15 certainty regions (with a "*" in the table below) and one large stratum from which 27 regions were selected (as shown in the table below).
- Implicit stratification by urbanization within selected regions (rural, settlement, city-fewer than 50,000 inhabitants, city-50,000 to 100,000 inhabitants, city-100,000 to 450,000 inhabitants, city-450,000 to 680,000 inhabitants, city-more than 680,000 inhabitants).
- Extra sampling stage (regions) required before sampling schools within selected regions. Roughly half of the regions were certainty regions (selected with a probability of one). Within these certainty regions, schools were paired for variance calculation purposes. Otherwise, selected regions were paired for variance calculation purposes.
- Sampled one classroom per school (in general).
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; and 2) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## Saudi Arabia

Fourth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS <6).
- No within-school exclusions.

## Sample Design

- Explicit stratification by school type and school gender.
- Implicit stratification by school location (Center, East, South, West, and North), public/private status, and school gender (boys or girls).
- Sampled two classrooms in large schools (MOS > 150).
- Oversampling of "religious schools" to allow for better estimates at that level.
- School sample overlap between TIMSS (Grade 4) and PIRLS: 1) Samples were drawn all at once; and 2) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## Exhibit 86: Allocation of School Sample in Saudi Arabia, Fourth Grade

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools where language of instruction is a language other than Serbian, special needs schools, and very small schools (satellite school/branch department).
- Within-school exclusions consisted of students taught in languages other than Serbian in mixed language schools, students with a functional or intellectual disability, and students from special needs classes within regular schools.

## Sample Design

- Explicit stratification by region, school type, and enrollment indicator.
- Implicit stratification by urban/rural school status, and performance level (index) for branch department.
- Sampled two classrooms in large schools (MOS > 80).

Exhibit 88: Allocation of School Sample in Serbia, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\qquad$ | $\qquad$ |  |  |

| Total | 160 | 3 | 152 | 4 | 0 | 0 | 1 |

## Singapore

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools and private schools.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" schools.
- No implicit stratification.
- Census of all schools. Within schools, two half classrooms were sampled with probability proportional to the size of the classroom. Within selected classrooms, 19 students were randomly sampled.
- All variance estimates were calculated using schools as variance strata.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade $4 \&$ Grade 8 " stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 89: Allocation of the School Sample between Studies in Singapore

| Explicit Strata | Total Sampled Schools | Allocation of Schools |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | To PIRLS Grade 4 | To TIMSS Grade 4 | To TIMSS Grade 8 |
| Grade 4 only | 173 | 173 | 173 | 0 |
| Grade 4 \& Grade 8 | 3 | 3 | 3 | 3 |
| Grade 8 only | 162 | 0 | 0 | 162 |
| Total | 338 | 176 | 176 | 165 |

Exhibit 90: Allocation of School Sample in Singapore, Fourth Grade

| Total | 176 | 0 | 176 | 0 | 0 | 0 | 0 |

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools and private schools.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by "Grade 8" / "Grade 4 \& Grade 8" schools.
- No implicit stratification.
- Census of all schools. Within schools, two half classrooms were sampled with probability proportional to the size of the classroom. Within selected classrooms, 19 students were randomly sampled.
- All variance estimates were calculated using schools as variance strata.
- Overlap was maximized between the Grade 4 \& Grade 8 school samples (see Grade 4 above).

## Slovenia

Fourth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5), schools for students with special needs ( 58 schools), Waldorf schools, and schools for the Italian minority ( 4 schools).
- Within-school exclusions consisted of students with special needs enrolled in normal school classes but following a limited curriculum.

## Sample Design

- Explicit stratification by region, geographic area, and "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by language achievement index, mathematics achievement index, and region (12).
- Sampled two classrooms in large schools (MOS > 55).
- There were two census strata and some certainty schools outside these two strata. Variance estimates were calculated using schools as variance strata for these certainty schools.
- Oversampling to allow for better estimates at the regional level.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) Most sampled schools in the "Grade 4 \& Grade 8 " stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 93: Allocation of the School Sample between Studies in Slovenia

## South Africa

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of educational schools for learners with special educational needs and very small schools.
- No within-school exclusions.

## Sample Design

- Explicit stratification by province, language, and school type.
- Implicit stratification by poverty index (7) and location (10).
- Sampled two classrooms in bilingual schools (one classroom per language).

Exhibit 96: Allocation of School Sample in South Africa, Eighth Grade

## Spain

## Fourth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 4), international schools, and special education schools.
- Within-school exclusions consisted of disabled students and nonnative language speakers (less than 1 year of instruction in language of assessment).

## Sample Design

- Explicit stratification by autonomous community.
- Implicit stratification by public/private status (2).
- Sampled two classrooms per school in larger schools (MOS > 55).
- School sample overlap between PIRLS and TIMSS at Grade 4: 1) Samples were drawn all at once; 2) A subset of the sampled schools in Andalusia and in the Canary Islands participated in TIMSS; and 3) In all strata, all sampled students for TIMSS also were asked to take PIRLS.

## Sweden

Fourth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5), international schools, and special schools for disabled students.
- Within-school exclusions consisted of students with special needs.

## Sample Design

- Explicit stratification by immigrant status, and new school status since school listing
- Implicit stratification by "Grade 4" / "Grade $4 \&$ Grade 8 " school type, and grade point average (7).
- Oversampling to allow for better estimates at the immigrant status level. More classrooms were sampled in "higher percentage of immigrants" strata.
- School sample overlap between PIRLS and TIMSS at Grade 4:

1) Samples were drawn all at once; and 2) All sampled students for TIMSS also were asked to take PIRLS.

Exhibit 99: Allocation of School Sample in Sweden, Fourth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{array}{\|c} \text { 1st } \\ \text { Replacements } \end{array}$ | 2nd Replacements |  |  |
| No Immigrants | 56 | 2 | 52 | 2 | 0 | 0 | 0 |
| Low Percentage of Immigrants | 62 | 3 | 57 | 1 | 0 | 1 | 0 |
| Medium Percentage of Immigrants | 21 | 2 | 19 | 0 | 0 | 0 | 0 |
| High Percentage of Immigrants | 20 | 1 | 18 | 0 | 1 | 0 | 0 |
| New Schools | 2 | 0 | 2 | 0 | 0 | 0 | 0 |
| Total | 161 | 8 | 148 | 3 | 1 | 1 | 0 |

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 6), international schools, and special schools for disabled students.
- Within-school exclusions consisted of students with special needs.

## Sample Design

- Explicit stratification by immigrant status, and new school status since school listing.
- Implicit stratification by "Grade 8" / "Grade 4 \& Grade 8" school status and school grade point average (7).
- Oversampling to allow for better estimates at the immigrant status level. More classrooms were sampled in "higher percentage of immigrants" strata.
- The school sample for TIMSS at Grade 8 was selected by controlling for the overlap with the sample at Grade 4 using the Chowdhury approach (samples drawn sequentially). The TIMSS sample of schools at Grade 8 was selected in a way that minimized the overlap.

Exhibit 100: Allocation of School Sample in Sweden, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |

| High Percentage of Immigrants | 20 | 1 | 19 | 0 | 0 | 0 | 0 |
| New Schools | 2 | 0 | 2 | 0 | 0 | 0 | 0 |
| Total | 159 | 3 | 152 | 1 | 0 | 3 | 0 |

## Syrian Arab Republic

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of UNRWA schools and very small schools (MOS < 10).
- No within-school exclusions.

Sample Design

- Explicit stratification by school gender, and public/private school type.
- Implicit stratification by province (14).
- Sampled one classroom per school.

Exhibit 101: Allocation of School Sample in the Syrian Arab Republic, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total | 150 | 0 | 148 | 0 | 0 | 2 | 0 |

## Thailand

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special education schools and very small schools (MOS < 6).
- No within-school exclusions.

Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school status and school type.
- Implicit stratification by region (North, South, Central, Northeastern, and Bangkok)
- Sampled one classroom per school.
- Oversample in the Bangkok Met. Administration, Department of Local Administration, and Higher Education Commission strata in order to reduce variance estimates.
- School sample overlap between Grade 4 and Grade 8 populations: 1) Samples were drawn all at once; and 2) Most sampled schools in the "Grade $4 \&$ Grade 8" strata were asked to participate in both studies.

Exhibit 102: Allocation of the School Sample between Studies in Thailand

|  | Explicit Strata | Allocation of Schools |  |

| Total | 217 | 6 | 207 | 0 | 0 | 4 | 0 |

## Turkey

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 5) and special education schools.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by geographic region, and "Grade 4" / "Grade 4 \& Grade 8" school status.
- Implicit stratification by public/private school type, and urban/rural school status.
- Sampled one classroom per school.
- Oversampling to allow for better estimates at the regional level (minimum of 30 schools per region).
- School sample overlap between Grade 4 and Grade 8 populations:

1) Samples were drawn all at once; and 2) All sampled schools in the "Grade 4 \& Grade 8" strata were asked to participate in both studies.

Exhibit 107: Allocation of School Sample in Turkey, Fourth Grade

## United Arab Emirates

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools with students taught in languages other than Arabic and English (see the Dubai section), schools that are geographically inaccessible, very small schools ( $\mathrm{MOS}<10$ ), and special education schools (see the Dubai section).
- Within-school exclusions consisted of students with functional disabilities.

## Sample Design

- Explicit stratification by educational zones, and "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by school type (public, private, and "other"), curricula, school gender (boys, co-educational, or girls), and assessment language (English, Arabic, or both).
- Census of all schools in Dubai, in the West region of Abu Dhabi, and in the educational zone of Umm-Al Quwain (with two sampled classrooms per school). Classes within these schools were used to build jackknife replicates for variance calculation. Also, there were certainty schools
outside of these regions, and variance calculation was done following the same approach for these schools.
- The United Arab Emirates was divided into three large districts: Abu Dhabi (Abu Dhabi, Al Ain, and West region), Dubai, and the rest of the Emirates. All three districts were oversampled to allow for better estimates at the district level.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 and Grade 8 " stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## United States

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- No school-level exclusions.
- Within-school exclusions consisted of students who lack English language proficiency and students with disabilities.

Sample Design

- Explicit stratification by high/low poverty index, public/private status, and census region.
- Implicit stratification by location (city, rural, suburban, or town) and ethnic status.
- The same schools were sampled for both TIMSS and PIRLS studies. Within the sampled schools, different classrooms (students) were sampled for each study. In general, two classrooms were sampled per study per school.
- Sampled schools with only one classroom were randomly assigned to TIMSS or PIRLS. These schools were treated as nonresponse.
- Response adjustment cells are given by the explicit strata for all schools except private schools. For private schools, all four private strata were merged to define a single adjustment cell.
- Oversampling to compensate for losses linked to splitting the sample allocation between TIMSS and PIRLS (in previous cycle, sample of 300 schools with two classrooms per school).

Exhibit 113: Allocation of School Sample in the United States, Fourth Grade

| Total | 450 | 12 | 347 | 21 | 1 | 68 | 1 |

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- No school-level exclusions.
- Within-school exclusions consisted of students who lack English language proficiency and students with disabilities.

## Sample Design

- Explicit stratification by high/low poverty index, public/private status, and census region.
- Implicit stratification by location (city, rural, suburban, or town) and ethnic status.
- The same schools were sampled for both TIMSS and another national study. Within the sampled schools, different classrooms (students) were sampled for each study. In general, two classrooms were sampled per study per school.
- Sampled schools with only one classroom were randomly assigned to TIMSS or the other national study. These schools assigned to the national study were treated as nonresponse for TIMSS.
- Sampled one classroom per school for TIMSS.
- Response adjustment cells are given by the explicit strata for all schools except the private schools. For private schools, all four private strata were merged to define a single adjustment cell.
- Oversampling to compensate for losses linked to splitting the sample allocation between TIMSS and the national study (in previous cycle, sample of 300 schools with two classrooms per school).

## Exhibit 114: Allocation of School Sample in the United States, Eighth Grade

## Yemen

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of governorate Al-Jauf (remote area), regular kids from Foundation Grades Initiative (FGI) schools, very small schools (MOS < 8), and international schools.
- Within-school exclusions consisted of English sections/classes in national private schools.

## Sample Design

- Explicit stratification by program (Foundation Grades Initiative (FGI), and Not Foundation Grades Initiative), urban/rural school status, "Grade 4" / "Grade 4 \& Grade 6" school status, and school gender.
- Implicit stratification by governorate (21), and private/national and public school status (2).
- Census of all Foundation Grades Initiative schools. Variance estimates from this stratum were derived using schools as variance strata.

Exhibit 115: Allocation of School Sample in Yemen, Fourth

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

| Grade 4 \& Grade 6 - Not FGI - Coed - Urban | 27 | 0 | 26 | 0 | 0 | 0 | 1 |
| Total | 223 | 1 | 216 | 0 | 0 | 2 | 4 |

## Sixth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 8), international schools, and governorate Al-Jauf (remote area).
- Within-school exclusions consisted of English sections/classes in national private schools.

## Sample Design

- Explicit stratification by "Grade 6" / "Grade 4 \& Grade 6" school status, program (Foundation Grades Initiative (FGI) and Not Foundation Grades Initiative), school gender, and urban/rural school status
- Implicit stratification by governorate (21), and private/national and public school status.
- Sampled one classroom per school.
- All sampled schools for TIMSS at Grade 6 were asked to participate at TIMSS at Grade 4.

## Exhibit 116: Allocation of School Sample in Yemen, Sixth Grade

| Total | 150 | 2 | 146 | 0 | 0 | 1 | 1 |

## TIMSS 2011 Characteristics of Benchmarking Participants

## Alberta, Canada

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 7).
- Within-school exclusions consisted of students with special needs.

## Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school type and school size.
- Implicit stratification by funding (private, public, and "other") and immersion school status (yes or no).
- Sampled two classrooms in large schools (MOS > 32).
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) No sampled schools involved in both Grade 4 and Grade 8 populations; and 3) Sampled schools from the large strata were involved in both TIMSS and PIRLS at Grade 4. However, students within the schools either took TIMSS or PIRLS. No students took both TIMSS and PIRLS.

Exhibit 117: Allocation of School Sample between Studies in Alberta

| Explicit Strata | Total Sampled Schools | Allocation of Schools |  |  |
| :---: | :---: | :---: | :---: | :---: |

| Grade 4 \& Grade 8 - Small | 21 | 1 | 17 | 2 | 0 | 0 | 1 |
| Total | 150 | 4 | 141 | 2 | 0 | 1 | 2 |

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 7).
- Within-school exclusions consisted of students with special needs.

## Sample Design

- Explicit stratification by "Grade 8" / "Grade 4 \& Grade 8" school type and school size.
- Implicit stratification by funding (private, public, and "other") and immersion school status (yes or no).
- Sampled two classrooms in large schools (MOS > 116).
- No overlap between the Grade 4 and Grade 8 school samples (see Grade 4 above).

## Exhibit 119: Allocation of School Sample in Alberta, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1 1st Replacements | 2nd Replacements |  |  |

| Grade 4 \& Grade 8 - Small | 30 | 0 | 28 | 0 | 0 | 2 | 0 |
| Total | 150 | 2 | 133 | 10 | 2 | 2 | 1 |

## Ontario, Canada

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools (MOS < 6), First Nations schools, and special education schools.
- Within-school exclusions consisted of students with special educational needs and students who do not speak English or French.

## Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school type and English/French status.
- Implicit stratification by geographic region (Barrie, London, Ottawa, Sudbury, Thunder Bay, and Toronto) and school type (Catholic, private, Protestant, separate, and public).
- Sampled two classrooms in large schools (MOS > 32).
- There were some certainty-selected schools, but there were too few to use special estimation variance procedures.
- School samples overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) No sampled schools involved in both TIMSS at Grade 4 and PIRLS; 3) All sampled schools from the "Grade $4 \&$ Grade 8 " strata are involved in either TIMSS at Grade 4 or PIRLS; and 4) A subset of these "Grade 4 \& Grade 8 " schools also were involved in TIMSS at Grade 8.

Exhibit 120: Allocation of the School Sample between Studies in Ontario

## Québec, Canada

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special needs schools, very small schools (MOS < 10), Native schools, and non-Ministry Schools.
- Within-school exclusions consisted of children with disabilities.

## Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school type and English/French status.
- Implicit stratification by public/private status, and Native status (yes or no).
- Sampled one classroom per school.
- There were some certainty-selected schools, but there were too few to use special estimation variance procedures.
- Oversampling of the "English" strata.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 \& Grade 8 " stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 123: Allocation of School Sample between Studies in Québec

| Explicit Strata | Total Sampled Schools | Allocation of Schools |  |  |

| Grade 4 \& Grade 8 English | 10 | 0 | 10 | 0 | 0 | 0 | 0 |
| Total | 200 | 2 | 189 | 1 | 0 | 7 | 1 |

## Eighth Grade

## Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of special needs schools, very small schools (MOS < 10), Native schools, and non-Ministry schools.
- Within-school exclusions consisted of children with disabilities.

## Sample Design

- Explicit stratification by "Grade 8" / "Grade 4 \& Grade 8" school type, special programs school status, and English/French status.
- Implicit stratification by public/private status, and Native status (yes or no).
- Sampled two classrooms per school in the special programs stratum (one classroom per program).
- There were some certainty-selected schools, but there were too few to use special estimation variance procedures.
- Oversampling of the "English" strata.
- Census of all English schools in the Grade 8 only schools. Schools were used as variance strata whenever at least two classrooms or all classrooms were sampled.
- Overlap was maximized between the Grade 4 and Grade 8 school samples (see Grade 4 above).

Exhibit 125: Allocation of School Sample in Québec, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Abu Dhabi, UAE

## Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of very small schools, and schools with students taught in languages other than Arabic and English.
- No within-school exclusions.

## Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" schools and educational zones.
- Implicit stratification by private/public status, curricula (24), school gender (boys, co-educational, or girls), and test language (English, Arabic, or both).
- Sampled two classrooms per school in the West region.
- All schools from the West region were sampled. Classes within schools were used to build jackknife replicates for variance calculation. There were certainty schools (schools selected with certainty) outside of that region, and variance calculation was done following the same approach for these schools.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 and Grade 8" stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

Exhibit 126: Allocation of the School Sample between Studies in Abu Dhabi

## Dubai, UAE

Fourth Grade
Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools with students taught in languages other than Arabic and English, special education schools, and very small schools (MOS < 10). Statistics on the number of students taught in languages other than English and Arabic were not available and were estimated using the sample (11 such schools were identified in the sample). The corresponding exclusion rates are found under the within-school exclusion rates.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by "Grade 4" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by curricula (14) and assessment language (English, Arabic, or both).
- Sampled two classrooms per school.
- All schools were sampled. Classes within schools were used to build jackknife replicates for variance calculation.
- School sample overlap between TIMSS (Grade 4), PIRLS, and TIMSS (Grade 8): 1) Samples were drawn all at once; 2) All sampled schools in the "Grade 4 and Grade 8" stratum were asked to participate in all studies; and 3) All sampled students for TIMSS at Grade 4 also were asked to take PIRLS.

## Exhibit 129: Allocation of the School Sample between Studies in Dubai

## Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent.
- School-level exclusions consisted of schools with students taught in languages other than Arabic and English, special education schools, and very small schools (MOS < 10). Statistics on the number of students taught in languages other than English and Arabic were not available and were estimated using the sample ( 11 such schools were identified in the sample). The corresponding exclusion rates are found under the within-school exclusion rates.
- Within-school exclusions consisted of students with special educational needs.

## Sample Design

- Explicit stratification by "Grade 8" / "Grade 4 \& Grade 8" school type.
- Implicit stratification by curricula (14) and assessment language (English, Arabic, or both).
- Sampled two classrooms per school.
- All schools were sampled. Classes within schools were used to build jackknife replicates for variance calculation.
- Maximum possible overlap between the Grade 4 and Grade 8 school samples (see Grade 4 above).

Exhibit 131: Allocation of School Sample in Dubai, Eighth Grade

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st Replacements | 2nd Replacements |  |  |
| Dubai Grade 8 only | 34 | 0 | 32 | 0 | 0 | 0 | 2 |
| Dubai Grade 4 \& Grade 8 | 109 | 1 | 98 | 0 | 0 | 1 | 9 |
| Total | 143 | 1 | 130 | 0 | 0 | 1 | 11 |

## Alabama, US

## Eighth Grade

Coverage and Exclusions

- Coverage is 92 percent. Coverage in this state was restricted to students in public schools ( $92 \%$ of the international target population).
- No school-level exclusions.
- Within-school exclusions consisted of students who lack English language proficiency and students with disabilities.

## Sample Design

- Explicit stratification by high/low poverty index.
- Implicit stratification by location (city, rural, suburban, or town) and ethnic status.
- The sample includes schools that were previously selected as part of the TIMSS national sample as well as supplemental schools. The target sample was to have 100 assessed classrooms.
- Sampled two classrooms per school in the "supplemental" sample as opposed to one in the TIMSS national (US) sample.
- The TIMSS National US sampled schools were added to this sample with new school IDs. The "supplemental" school sample was selected by controlling for overlap with the TIMSS National US and NAEP (Alpha-public schools) samples using the Chowdhury approach (samples drawn sequentially). This strategy maximized the overlap with the TIMSS national sample and minimized the overlap with the NAEP (Alpha-public schools) sample. In summary, priority was given to schools selected for the TIMSS national sample (including schools also selected for the NAEP Alpha sample); then priority was given to schools not selected for either the TIMSS national or NAEP Alpha samples; and finally priority was given to schools selected for the NAEP Alpha sample and not selected for the TIMSS national sample.

| Total | 94 | 0 | 79 | 3 | 0 | 11 | 1 |

## Colorado, US

Eighth Grade
Coverage and Exclusions

- Coverage is 94 percent. Coverage in this state was restricted to students in public schools ( $94 \%$ of the international target population).
- No school-level exclusions.
- Within-school exclusions consisted of students who lack English language proficiency and students with disabilities.

## Sample Design

- Explicit stratification by high/low poverty index.
- Implicit stratification by location (city, rural, suburban, or town) and ethnic status.
- The sample includes schools that were previously selected as part of the TIMSS national sample as well as supplemental al schools. The target sample was to have 100 assessed classrooms.
- Sampled two classrooms per school in the "supplemental" sample as opposed to one in the TIMSS national (US) sample.
- The TIMSS National US sampled schools were added to this sample with new school IDs. The "supplemental" school sample was selected by controlling for overlap with the TIMSS National US and NAEP (Alpha-public schools) samples using the Chowdhury approach (samples drawn sequentially). This strategy maximized the overlap with the TIMSS national sample and minimized the overlap with the NAEP
(Alpha-public schools) sample. | Total | 63 | 0 | 62 | 0 | 0 | 0 | 1 |

## Florida, US

Fourth Grade
Coverage and Exclusions

- Coverage is 89 percent. Coverage in this state was restricted to students in public schools ( $89 \%$ of the international target population).
- No school-level exclusions.
- Within-school exclusions consisted of students who lack English language proficiency, and students with disabilities.

## Sample Design

- Explicit stratification by high/low poverty index.
- Implicit stratification by location (city, rural, suburban, or town) and ethnic status.
- The same schools were sampled for both TIMSS and PIRLS studies. Within the sampled schools, different classrooms (students) were sampled for each study. In general, two classrooms were sampled per study per school.
- The TIMSS National US sampled schools were added to this sample with new school IDs. The "supplement" school sample was selected by controlling for overlap with the TIMSS National US and NAEP (Alphapublic schools) samples using the Chowdhury approach (samples drawn sequentially). This strategy maximized the overlap with the TIMSS national sample and minimized the overlap with the NAEP (Alphapublic schools) sample. In summary, priority was given to schools selected for the TIMSS national sample (including schools also selected for the NAEP Alpha sample); then priority was given to schools not selected for either the TIMSS national or NAEP Alpha samples; and finally priority was given to schools selected for the NAEP Alpha sample and not selected for the TIMSS national sample.

## North Carolina, US

## Fourth Grade

Coverage and Exclusions

- Coverage is 93 percent. Coverage in this state was restricted to students in public schools ( $93 \%$ of the international target population).
- No school-level exclusions.
- Within-school exclusions consisted of students who lack English language proficiency, and students with disabilities.

Sample Design

- Explicit stratification by high/low poverty index.
- Implicit stratification by location (city, rural, suburban, or town) and ethnic status.
- In general, two classrooms were sampled per school.
- The TIMSS National US sampled schools were not added to this sample. The school sample was selected controlling for overlap with the TIMSS National US and NAEP (Alpha-public schools) samples using the Chowdhury approach (samples drawn sequentially). The strategy minimized the overlap with both the TIMSS national sample and the NAEP (Alpha-public schools) sample. In summary, priority was given to schools not already selected for either the NAEP Alpha or TIMSS national samples, then priority was given to schools selected for the NAEP Alpha sample and not selected for the TIMSS national sample, then priority was given to schools selected for the TIMSS national sample and not the NAEP Alpha sample, and finally priority was given to schools selected for both these studies. The targeted school sample size was 50.
