## Appendix 5A: Characteristics of National Samples

## Australia

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5), special needs schools, and very remote schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by state or territory (8)
- Implicit stratification by geographic location (metropolitan, provincial, remote), school type (Catholic, government, independent), and socioeconomic index (low socioeconomic status, high socioeconomic status)
- Prior to class sampling within schools, all indigenous students were grouped into a single classroom and were selected with certainty. The other classroom in the school was sampled using the standard procedure.
- Schools were oversampled at the state/territory level

Allocation of School Sample in Australia

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | 1st <br> Replacements | 2nd Replacements |  |  |
| Australian Capital Territory | 30 | 0 | 29 | 1 | 0 | 0 | 0 |
| New South Wales | 45 | 0 | 42 | 2 | 1 | 0 | 0 |
| Northern Territory | 15 | 0 | 15 | 0 | 0 | 0 | 0 |
| Queensland | 45 | 0 | 45 | 0 | 0 | 0 | 0 |
| South Australia | 41 | 0 | 41 | 0 | 0 | 0 | 0 |
| Tasmania | 27 | 0 | 27 | 0 | 0 | 0 | 0 |
| Victoria | 44 | 0 | 43 | 1 | 0 | 0 | 0 |
| Western Australia | 39 | 0 | 39 | 0 | 0 | 0 | 0 |
| Total | 286 | 0 | 281 | 4 | 1 | 0 | 0 |

## Austria

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<3$ ) and special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers
- Exclusion rates are higher than usual because of more non-native language speakers in classes. This higher proportion of non-native language speakers is probably due to the refugee crisis in Europe.

## Sample Design

- Explicit stratification by region (9)
- No implicit stratification
- Sampled two classrooms per school whenever possible

## Allocation of School Sample in Austria

Explicit Strata | Total |

| Wien | $\mathbf{3 0}$ | 152 | $\mathbf{2}$ | $\mathbf{1 5 0}$ | $\mathbf{0}$ | $\mathbf{0}$ | 0 |
| Total | $\mathbf{1 5 9}$ |  | 0 | 0 | 0 |  |  |

## Azerbaijan

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, and schools with English and Georgian instructional language
- No within-school exclusions
- Exclusion rates are biased downward due to exclusion of Armenian community schools in the Nagorno-Karabakh conflict zone and international schools for which no statistics were available

## Sample Design

- Explicit stratification by language of instruction (Azerbaijani only, Russian or Russian/ Azerbaijani), urbanization (urban, rural) within Azerbaijani only strata, and city (Baku, other) within urban stratum
- No implicit stratification
- Sampled two classrooms in schools with four or more classrooms

Allocation of School Sample in Azerbaijan

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Azerbaijani - Urban <br> - Baku | 24 | 0 | 24 | 0 | 0 | 0 | 0 |
| Azerbaijani - Urban <br> - Other cities | 38 | 0 | 38 | 0 | 0 | 0 | 0 |
| Azerbaijani - Rural | 68 | 0 | 68 | 0 | 0 | 0 | 0 |
| Russian or Russian/ Azerbaijani | 40 | 0 | 40 | 0 | 0 | 0 | 0 |
| Total | 170 | 0 | 170 | 0 | 0 | 0 | 0 |

## Bahrain

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<10$ ), special needs schools, students taught in French, and students taught in Japanese
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by governorate (5) and gender (girls, boys) within public schools
- No implicit stratification
- Sampled one classroom per school
- All schools were selected
- Schools or classes were used as variance estimation strata and classes or half classes were used to build jackknife replicates, when all classes within school were sampled

## Allocation of School Sample in Bahrain

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Public Northern Boys | 17 | 0 | 17 | 0 | 0 | 0 | 0 |
| Public Southern Girls | 11 | 0 | 11 | 0 | 0 | 0 | 0 |
| Public Southern Boys | 11 | 0 | 11 | 0 | 0 | 0 | 0 |
| Private | 63 | 1 | 61 | 0 | 0 | 1 | 0 |
| Total | 184 | 1 | 182 | 0 | 0 | 1 | 0 |

## Belgium (Flemish)

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<$ ) and French schools
- Within-school exclusions consisted of students with intellectual disabilities and nonnative language speakers

## Sample Design

- Explicit stratification by region (6), socioeconomic status (4), school type (official, private), and a stratum of eligible special education schools
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 37)
- Field Test and Main Data Collection samples were selected separately. PIRLS Field Test sample was selected simultaneously with the TIMSS 2015 Main Data Collection sample to avoid overlap. PIRLS Main Data Collection sample was selected using the Chowdhury method to minimize overlap with both PIRLS Field Test sample and TIMSS 2015 Main Data Collection sample.

## Allocation of School Sample in Belgium (Flemish)

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

| West-Vlaanderen -Med-High SES | 7 | 0 | 7 | 0 | 0 | 0 | 0 |
| West-Vlaanderen Lower SES | 9 | 0 | 8 | 1 | 0 | 0 | 0 |
| Special Education schools | 10 | 2 | 5 | 1 | 1 | 1 | 0 |
| Total | 160 | 3 | 124 | 19 | 5 | 9 | 0 |

## Belgium (French)

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ) and special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school network (public at state level, public at local level, private) and socioeconomic status (4)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size $>47$ )

## Allocation of School Sample in Belgium (French)

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{gathered} \text { 1st } \\ \text { Replacements } \end{gathered}$ | $\qquad$ |  |  |
| Public at state level - 1st and 2nd SES quartiles | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Public at state level - 3rd and 4th SES quartiles | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Public at local level - 1st SES quartile | 18 | 0 | 18 | 0 | 0 | 0 | 0 |
| Public at local level 2nd SES quartile | 16 | 0 | 15 | 1 | 0 | 0 | 0 |
| Public at local level - 3rd SES quartile | 20 | 0 | 20 | 0 | 0 | 0 | 0 |
| Public at local level - 4th SES quartile | 22 | 0 | 22 | 0 | 0 | 0 | 0 |
| Private sectarian 1st SES quartile | 14 | 0 | 13 | 1 | 0 | 0 | 0 |
| Private sectarian 2nd SES quartile | 14 | 0 | 13 | 1 | 0 | 0 | 0 |
| Private sectarian 3rd SES quartile | 20 | 0 | 18 | 2 | 0 | 0 | 0 |
| Private sectarian 4th SES quartile | 18 | 0 | 17 | 1 | 0 | 0 | 0 |
| Total | 158 | 0 | 152 | 6 | 0 | 0 | 0 |

## Bulgaria

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ) and special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (elementary, basic, general) and urbanization (capital, large cities, other)
- Implicit stratification by urbanization (city, village) within the basic schools found outside the larger cities
- Sampled two classrooms in large schools (measure of size $>69$ )
- The school sample was selected by controlling for the overlap with the TIMSS 2015 sample using the Chowdhury approach

## Allocation of School Sample in Bulgaria

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{array}{\|c\|} \hline \text { 1st } \\ \text { Replacements } \end{array}$ | 2nd Replacements |  |  |
| Elementary Capital and Large Cities | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Elementary - Others | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Basic - Capital | 10 | 1 | 9 | 0 | 0 | 0 | 0 |
| Basic - Large Cities | 29 | 0 | 29 | 0 | 0 | 0 | 0 |
| Basic - Others | 44 | 0 | 44 | 0 | 0 | 0 | 0 |
| General - Capital | 14 | 0 | 14 | 0 | 0 | 0 | 0 |
| General - Large Cities | 17 | 0 | 17 | 0 | 0 | 0 | 0 |
| General - Others | 24 | 0 | 24 | 0 | 0 | 0 | 0 |
| Total | 154 | 1 | 153 | 0 | 0 | 0 | 0 |

## Canada

## Coverage and Exclusions

- Coverage is 96.9 percent. Coverage in Canada is restricted to students from the provinces of Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland, Ontario, Quebec, and Saskatchewan.
- School-level exclusions consisted of very small schools (measure of size $<4$ in Manitoba and Saskatchewan; measure of size $<6$ in Alberta, Newfoundland, and Ontario; measure of size $<9$ in British Columbia; and measure of size $<10$ in Quebec); special needs schools, First Nations, French first language (in Newfoundland); home schooled, institutional, and private schools as well as public special schools (in Manitoba); international schools, non-ministry, and special status schools (in Quebec); and distance learning and not funded schools (in British Colombia)
- For ePIRLS, coverage is 74 percent. Coverage in Canada is restricted to students from the provinces of British Columbia, Newfoundland, Ontario, and Quebec.
- For ePIRLS, school-level exclusions consisted of very small schools (measure of size $<4$ in Manitoba and Saskatchewan, measure of size $<6$ in Alberta, Newfoundland and Ontario, measure of size $<9$ in British Columbia, and measure of size $<10$ in Quebec); special needs schools, First Nations, French first language (in Newfoundland); international schools, non-ministry, and special status schools (in Quebec); and distance learning and not funded schools (in British Colombia)
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by province (8). Within the province of British Columbia, explicit stratification was done by school language (English, French) and school type within English schools (English only, immersion, dual track). Within the province of Alberta, explicit stratification was done by school system (French, English) and school type (immersion, regular). Within the province of Ontario, explicit stratification was done by school type (private, Catholic, public) and language (English, French) within Catholic and public schools. Within Quebec, explicit stratification was done by school type (public, private) and language (French, English). Within the province of New Brunswick, explicit stratification was done by school language (English, French)
- Implicit stratification by region (4) in public and Catholic explicit strata within Ontario
- Sampled two classrooms in large schools for Quebec and Ontario (measure of size >80), as well as in Alberta French schools. All classrooms selected in British Columbia French schools.
- The PIRLS school sample was selected by controlling for the overlap with the TIMSS 2015 Grade 4 sample using the Chowdhury approach
- All French schools in British Columbia were selected
- For ePIRLS, only a subsample of PIRLS schools was randomly selected in Quebec. School weights were adjusted accordingly.
- In British Columbia French schools stratum, schools or classes were used as variance estimation strata and half classes were used as jackknife replicates

## Allocation of School Sample in Canada - PIRLS

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\qquad$ | $\begin{gathered} \text { 2nd } \\ \text { Replacements } \end{gathered}$ |  |  |
| Newfoundland | 130 | 0 | 128 | 0 | 0 | 2 | 0 |
| New Brunswick English | 136 | 6 | 130 | 0 | 0 | 0 | 0 |
| New Brunswick French | 66 | 0 | 66 | 0 | 0 | 0 | 0 |
| Quebec - English Private | 8 | 1 | 7 | 0 | 0 | 0 | 0 |
| Quebec - English Public | 42 | 0 | 39 | 0 | 0 | 3 | 0 |
| Quebec - French Private | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Quebec - French Public | 118 | 1 | 35 | 25 | 13 | 44 | 0 |
| Ontario - Private | 8 | 0 | 0 | 1 | 0 | 7 | 0 |
| Ontario - English Catholic | 30 | 0 | 30 | 0 | 0 | 0 | 0 |
| Ontario - English Public | 80 | 2 | 77 | 1 | 0 | 0 | 0 |
| Ontario - French Catholic \& Public | 80 | 0 | 79 | 0 | 0 | 1 | 0 |
| Manitoba | 8 | 1 | 7 | 0 | 0 | 0 | 0 |

| Total | 507 | 4 | 467 | 6 | 1 | 29 | 0 |

## Chile

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, and geographically inaccessible schools
- Within-school exclusions consisted of students with intellectual disabilities

## Sample Design

- Explicit stratification by school type (public, private subsidized, private paid), urbanization (rural, urban) within public schools and school size (up to 40 students, 41-80 students, more than 80 students) within public and private subsidized schools
- No implicit stratification
- Sampled one classroom
- The school sample for PIRLS was selected by controlling for the overlap with the ICCS sample using the Chowdhury approach

Allocation of School Sample in Chile

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $$ | 2nd Replacements |  |  |
| Public - Urban - Up to 40 students | 14 | 0 | 14 | 0 | 0 | 0 | 0 |
| Public - Urban - 41 to 80 students | 16 | 0 | 16 | 0 | 0 | 0 | 0 |
| Public - Urban - 80 or more students | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| Public - Rural | 9 | 0 | 9 | 0 | 0 | 0 | 0 |
| Private subsidized Up to 40 students | 20 | 0 | 17 | 3 | 0 | 0 | 0 |
| Private subsidized 41 to 80 students | 24 | 0 | 22 | 1 | 1 | 0 | 0 |
| Private subsidized - 80 or more students | 24 | 0 | 21 | 3 | 0 | 0 | 0 |
| Private | 39 | 0 | 32 | 7 | 0 | 0 | 0 |
| Total | 154 | 0 | 139 | 14 | 1 | 0 | 0 |

## Chinese Taipei

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by region (north, middle, south, east and isolated islands). East and isolated islands were grouped together.
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 289)

## Allocation of School Sample in Chinese Taipei - PIRLS

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Denmark

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, daycare and rehabilitation home schools as well as German, English, and Rudolf Steiner schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (public, private)
- No implicit stratification
- Sampled one classroom per school

Allocation of School Sample in Denmark - PIRLS

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Egypt

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<10$ ), schools in Matrouh, and schools in North Sinai
- No within-school exclusions

## Sample design

- Explicit stratification by region (Capital, North, South) and school type (government, private)
- Implicit stratification by urbanization (urban, rural) within government schools strata
- Sampled one classroom per school

## Allocation of School Sample in Egypt

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{array}{\|c\|} \hline 1 \text { st } \\ \text { Replacements } \end{array}$ | $\begin{gathered} \text { 2nd } \\ \text { Replacements } \end{gathered}$ |  |  |
| Capital Government | 30 | 0 | 30 | 0 | 0 | 0 | 0 |

## England

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<8$ ), special needs schools, and pupil referral units
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (state-funded, private) and attainment level (5)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 99)
- The Field Test and Main Data Collection PIRLS samples were selected separately. The PIRLS Main Data Collection sample was selected by controlling for the overlap with the TIMSS 2015 samples and with the PIRLS Field Test sample using the Chowdhury approach.

## Allocation of School Sample in England

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{gathered} 1 \text { 1st } \\ \text { Replacements } \end{gathered}$ | 2nd Replacements |  |  |
| State-funded - Low attainment level | 26 | 0 | 25 | 1 | 0 | 0 | 0 |
| State-funded - Low to Mid attainment level | 34 | 0 | 34 | 0 | 0 | 0 | 0 |
| State-funded Mid and missing attainment level | 34 | 0 | 33 | 1 | 0 | 0 | 0 |
| State-funded - Mid to High attainment level | 35 | 0 | 35 | 0 | 0 | 0 | 0 |
| State-funded - High attainment level | 30 | 0 | 30 | 0 | 0 | 0 | 0 |
| Private | 12 | 1 | 11 | 0 | 0 | 0 | 0 |
| Total | 171 | 1 | 168 | 2 | 0 | 0 | 0 |

## Finland

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools and schools with instructional languages other than Finnish or Swedish
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by major region (Helsinki and Uusimaa, southern, western, northern) and urbanization (urban and semi-urban, rural) within Finnish schools. Swedish speaking schools are in a separate explicit stratum.
- No implicit stratification
- Sampled two classrooms per school
- The PIRLS samples were selected by controlling for the overlap with the TIMSS 2015 Main Data Collection sample using the Chowdhury approach

## Allocation of School Sample in Finland

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{array}{\|c\|} \hline \text { 1st } \\ \text { Replacements } \end{array}$ | 2nd Replacements |  |  |
| Helsinki \& Uusimaa | 40 | 0 | 39 | 0 | 0 | 1 | 0 |

| Total | 159 | 7 | 149 | 2 | 0 | 1 | 0 |

## France

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<3$ ), overseas territories, Reunion and Mayotte Islands, Guyana (Southern Hemisphere), private schools without contract, specialized schools, and French schools in foreign countries
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (public-other, public-priority education zone, private)
- No implicit stratification
- Sampled two classrooms per school
- PIRLS 2016 samples and TIMSS 2015 samples were selected simultaneously to avoid overlap between the two studies

## Allocation of School Sample in France

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original Schools | $\begin{array}{\|c\|} \hline \text { 1st } \\ \text { Replacements } \end{array}$ | 2nd Replacements |  |  |
| Public-other | 100 | 2 | 98 | 0 | 0 | 0 | 0 |
| Public-priority education zone | 44 | 1 | 42 | 1 | 0 | 0 | 0 |
| Private | 22 | 0 | 21 | 1 | 0 | 0 | 0 |
| Total | 166 | 3 | 161 | 2 | 0 | 0 | 0 |

## Georgia

## Coverage and Exclusions

- Coverage is 95.9 percent. Coverage in Georgia is restricted to students taught in Georgian and Azerbaijani.
- School-level exclusions consisted of very small schools (measure of size $<3$ ) and foreign instructional language schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by language taught in school (Georgian, Azerbaijani), teacher certification (certified, non-certified), urbanization (urban, rural), and school type (public, private)
- No implicit stratification
- Sampled two classrooms in Georgian schools with certified teachers
- The Field Test and Main Data Collection PIRLS samples were selected sequentially. The PIRLS Main Data Collection sample was selected by controlling for the overlap with the PIRLS Field Test sample using the Chowdhury approach.
- Oversampled Azerbaijani schools as well as public schools with certified teachers in order to get better estimates
- Class group option was used in bilingual schools as well as in schools with certified teachers

Allocation of School Sample in Georgia - PIRLS

## Iran, Islamic Rep. of

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, and geographically inaccessible schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (public, private), gender (mixed, other), region group (1,2,3), province or grouped provinces (6), and gender (boys, girls) within "other" gender public schools
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 119)
- The Field Test and Main Data Collection PIRLS samples were selected separately
- PIRLS and PIRLS Literacy booklets were rotated within classes

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Italy

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of Slovenian, Ladin, and German instructional language schools
- Within-school exclusions consisted of students with functional disabilities and nonnative language speakers

## Sample Design

- Explicit stratification by school type (private, public) and region (center, south and islands, north east, north west, south) within public schools
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 109)
- The Field Test and Main Data Collection PIRLS samples were selected separately. The PIRLS Main Data Collection sample was selected by controlling for the overlap with the TIMSS 2015 and PIRLS Field Test samples using the Chowdhury approach.

## Allocation of School Sample in Italy - PIRLS

## PIRLS

2016

## Kazakhstan

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<4$ ), special needs schools, and languages other than Kazakh and Russian
- No within-school exclusions

## Sample Design

- Explicit stratification by region (4), language (Kazakh, Russian, both languages) and urbanization (urban, rural)
- No implicit stratification
- Sampled two classrooms in schools with both Kazakh and Russian languages of instruction
- Class group option was used in bilingual schools

## Allocation of School Sample in Kazakhstan

## Kuwait

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools and minority language schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (public, private), region (6), and gender (male, female) within public schools, and language (Arabic, foreign, bilingual) within private schools
- No implicit stratification
- Sampled two classrooms in private bilingual schools
- The PIRLS samples were selected simultaneously with the TIMSS Main Data Collection to avoid overlap
- All private bilingual were sampled for PIRLS

## Allocation of School Sample in Kuwait

## Latvia

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools and schools with instructional language other than Latvian or Russian
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school level (Grade 4 only, Grade 4 and 8), urbanization (Riga, city, town and rural area), language (Latvian, Russian), and school type (gymnasiumsecondary, basic-beginners) within town and rural area Latvian schools
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 59)
- Did not participate in the Field Test. The PIRLS Main data Collection sample was selected simultaneously with the 2016 ICCS Main Data Collection sample to avoid overlap.
- Class group option was used in bilingual schools

## Allocation of School Sample in Latvia

## Lithuania

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, and other language schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by language (Lithuanian, Russian, Polish, mixed) and urbanization within Lithuanian schools (4)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size $>99$ ) and in bilingual schools
- The Field Test and Main data Collection PIRLS samples were selected sequentially
- Class group option was used in bilingual schools

## Allocation of School Sample in Lithuania

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |

## Macao SAR

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of international schools
- Within-school exclusions consisted of students with functional disabilities and nonnative language speakers

## Sample Design

- All schools were sampled and therefore no explicit or implicit stratification were used
- All classrooms selected within school
- Classes were used as variance estimation strata and half classes were used to build jackknife replicates
- Did not participate in the Field Test

Allocation of School Sample in Macao SAR

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |

## Malta

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<4$ ), special needs schools, and foreign instructional language schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (state, church, independent)
- No implicit stratification
- All classrooms were sampled
- All schools and all Grade 4 (Year 5) students were selected
- Classes were used as variance estimation strata and half classes were used to build jackknife replicates. All classrooms selected within schools.

## Allocation of School Sample in Malta

|  | Total <br> Explicit Strata <br> Sampled <br> Schools | Ineligible <br> Schools | Original <br> Schools | 1st <br> Replacements | 2nd <br> Replacements | Refusal <br> Schools | Excluded <br> Schools |

## Morocco

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 6)
- No within-school exclusions

## Sample Design

- Explicit stratification by school type (private, public) and region (16)
- No implicit stratification
- The Field Test and Main Data Collection PIRLS samples were selected separately. The PIRLS Main Data Collection sample was selected by controlling for the overlap with the TIMSS 2015 samples and with the PIRLS Field Test sample using the Chowdhury approach.
- Oversampling of private schools and public within each region. All public schools were sampled in the region of Oued eddahab Lagouira. In these census strata, two classrooms were selected per school, and schools or classes were used as variance estimation strata and classes or half classes were used to build jackknife replicates. Sampled one classroom per school in other strata.
- PIRLS and PIRLS Literacy booklets were rotated within classes

## Norway (5)

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, and instructional language other than Bokmal and Nynorsk
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by "Grade 5"/"Grade 4 and Grade 5" schools and language within "Grade 4 and Grade 5" stratum (Bokmål, Nynorsk)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size >45)
- The PIRLS school samples were selected by controlling for the overlap with the TIMSS 2015 sample using the Chowdhury approach

## Oman

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<4$ ) and special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (government, private, international) and governorate (11) within government schools
- No implicit stratification
- In census strata and schools selected with certainty, schools or classes were used as variance estimation strata and classes or half classes were used to build jackknife replicates. Two classrooms selected within these schools. Sampled one classroom per school in other schools.

## Russian Federation

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<4$ ) and special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by region (42)
- No implicit stratification
- Sampled two classrooms in large schools in Moscow City (measure of size $>270$ ), one classroom otherwise
- An extra sampling stage (regions) was required prior to sampling schools. 28 of 69 regions were selected with probability proportional to the region size and 14 bigger regions were selected with certainty. While each certainty region itself is an explicit stratum, the other sampled regions make one large explicit stratum. In the large explicit stratum, a sample of schools was selected within each region.
- Within regions, schools were selected with probability proportional to (school) size systematic sampling. Schools were sorted (serpentine) by location (up to 7 levels) before being sorted by school size. The same region sample was used for both TIMSS and PIRLS.
- Within the certainty regions, schools were paired for variance calculation purposes. Otherwise, selected regions were paired for variance calculation purposes.

## Singapore

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools and private schools
- For PIRLS 2016, like in all previous cycles, Singapore took a census of all public schools with Grade 4 students. The sampling frame excluded private schools, which are largely foreign-system schools operating in Singapore and which serve predominantly international students. These foreign-system schools are fundamentally different from the public schools in many respects (e.g., language of instruction; school-calendar year).
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- No explicit stratification
- No implicit stratification
- Sampled two classrooms per school
- Census of all schools. Within schools, two half classrooms were sampled with probability proportional to the size of the classroom. Within selected classrooms, 19 students were randomly sampled.
- Schools were used as variance estimation strata and classes were used to build jackknife replicates

Allocation of School Sample in Singapore - PIRLS

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |

## Slovak Republic

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<4$ ), special needs schools, and taught in language other than Slovak and Hungarian
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by language (Slovak, Hungarian), socioeconomic status (less than $1 \%$ of students coming from lower socioeconomic status, less than $10 \%$ of students coming from lower socioeconomic status, $10 \%$ or more students from lower socioeconomic status), and region group (5) within Slovak language strata
- No implicit stratification
- Sampled two classrooms per school
- Field Test and Main Data Collection samples were selected separately. The PIRLS Main Data Collection sample was selected using the Chowdhury method to minimize overlap with the PIRLS Field Test sample.
- Systematic sampling selection with equal probabilities used for sampling in strata with large sampling fractions

## Allocation of School Sample in Slovak Republic

## South Africa

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools, very small schools (measure of size $<6$ ), schools for which language of testing cannot be determined, and schools with less than 30 learners
- Within-school exclusions consisted of students with intellectual disabilities and nonnative language speakers

## Sample Design

- Explicit stratification by language (11) and province (9)
- No implicit stratification
- Sampled two classrooms or more in schools teaching in more than one language
- Class group option was used in schools teaching in more than one language

## Allocation of School Sample in South Africa

## Spain

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<4$ ), special needs schools, and international schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by region (8), school type (public, private). Within Madrid, private schools were also stratified by category (government dependent, independent) and by bilingual status (bilingual, not bilingual) within the public and government dependent private schools
- No implicit stratification
- Sampled two classrooms in large schools of Andalusia (measure of size >74) and one classroom otherwise
- Oversampling of schools in Andalusia, Asturias, Basque Country, Canary Islands, Castile and Leon, Catalonia, La Rioja, and Madrid

## Allocation of School Sample in Spain

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Sweden

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools, international schools, special program schools, and very small schools (measure of size < 5)
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by grade average (4)
- No implicit stratification
- Sampled two classrooms per school
- The PIRLS sample was selected by controlling for the overlap with the TIMSS Grade 4 and Grade 8 samples using the Chowdhury approach

Allocation of School Sample in Sweden - PIRLS

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |

## Trinidad and Tobago

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5)
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by type of school (government-related, private) and region within government-related stratum (8). Government-related strata include government and denominational schools.
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 69)

Allocation of School Sample in Trinidad and Tobago

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total | 152 | 1 | 151 | 0 | 0 | 0 | 0 |

## United Arab Emirates

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools, measure of size $<13$ for all Emirates except Dubai and Abu Dhabi and measure of size $<10$ for Dubai, schools with an instructional language other than Arabic, English, or French for Dubai and with an instructional language other than English and Arabic for the other Emirates, geographically inaccessible schools in all Emirates except Dubai, and home schools in Emirates other than Abu Dhabi and Dubai
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by Emirates (7), school type (public, private) and language of instruction (Arabic, English)
- No implicit stratification
- Census of schools in Dubai, Umm Al Quwain, and Fujairah private schools. Also, all private English schools with curriculum not from the United Kingdom, United States, or Canada, in the regions Abu Dhabi and Al Ain were sampled. In census strata, classes or half classes were used to build jackknife replicates for variance estimation. Two classrooms selected within these schools. Some schools are paired together within an explicit stratum when there is only one class participating.

## United States

## Coverage and Exclusions

- Coverage is 100 percent
- No school level exclusions
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by poverty level (high, low), school type (public, private), and census region (4)
- Implicit stratification by urbanization (city, suburb, town, rural) and ethnicity status (above $15 \%$ non-White students in a school, below $15 \%$ non-White students in a school)
- Sampled two classrooms in large schools
- High poverty level schools were oversampled

## Allocation of School Sample in United States - PIRLS

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

## Characteristics of Benchmarking Participants

## Buenos Aires, Argentina

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of distance learning schools and special education schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (public, private) and socioeconomic status (low, medium, high)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size $>70$ )

Allocation of School Sample in Buenos Aires, Argentina

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Original <br> Schools | $\begin{array}{\|c\|} \hline 1 \text { st } \\ \text { Replacements } \end{array}$ | 2nd Replacements |  |  |
| State - Low SES | 32 | 0 | 25 | 7 | 0 | 0 | 0 |
| State - Medium SES | 31 | 0 | 30 | 1 | 0 | 0 | 0 |
| State - High SES | 15 | 0 | 10 | 5 | 0 | 0 | 0 |
| Private - Low SES | 18 | 0 | 16 | 2 | 0 | 0 | 0 |
| Private - Medium SES | 27 | 0 | 24 | 3 | 0 | 0 | 0 |
| Private - High SES | 27 | 0 | 26 | 1 | 0 | 0 | 0 |
| Total | 150 | 0 | 131 | 19 | 0 | 0 | 0 |

## Ontario, Canada

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<6$ ), special needs schools, and First Nations schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (private, Catholic, public) and language (English, French) within Catholic and public schools
- Implicit stratification by region (4) in public and Catholic explicit strata
- Sampled two classrooms in large schools (measure of size > 79)
- The school sample for PIRLS was selected by controlling for the overlap with the TIMSS Grade 4 using the Chowdhury approach

Allocation of School Sample in Ontario, Canada

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Private | 8 | 0 | 0 | 1 | 0 | 7 | 0 |
| English - Catholic | 30 | 0 | 30 | 0 | 0 | 0 | 0 |
| English - Public | 80 | 2 | 77 | 1 | 0 | 0 | 0 |
| French - Catholic \& Public | 80 | 0 | 79 | 0 | 0 | 1 | 0 |
| Total | 198 | 2 | 186 | 2 | 0 | 8 | 0 |

## Quebec, Canada

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<10$ ), special needs schools, international schools, non ministry schools, and special status schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (public, private) and language (French, English)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size >80)
- The school sample for PIRLS was selected by controlling for the overlap with the TIMSS Grade 4 using the Chowdhury approach

Allocation of School Sample in Quebec, Canada

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal Schools | Excluded Schools |

| English - Private | 8 | 1 | 7 | 0 | 0 | 0 | 0 |
| English - Public | 42 | 0 | 39 | 0 | 0 | 3 | 0 |
| French - Private | 8 | 0 | 8 | 0 | 0 | 0 | 0 |
| French - Public | 118 | 1 | 35 | 25 | 13 | 44 | 0 |
| Total | 176 | 2 | 89 | 25 | 13 | 47 | 0 |

## Denmark (3)

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, daycare and rehabilitation home schools as well as German, English, and Rudolf Steiner schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by school type (2)
- No implicit stratification
- Sampled one classroom per school
- The same sample of schools for PIRLS Grade 4 was used for Grade 3

Allocation of School Sample in Denmark (3)

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |

| Private | 27 | 0 | 16 | 6 | 1 | 4 | 0 |
| Total | 198 | 7 | 170 | 15 | 1 | 5 | 0 |

## Norway (4)

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size $<5$ ), special needs schools, instructional language other than Bokmal and Nynorsk, and school for adults
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by "Grade 4"/"Grade 4 and Grade 5" schools and language within "Grade 4 and Grade 5" (Bokmål, Nynorsk)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 45)
- The PIRLS school samples were selected by controlling for the overlap with the TIMSS 2015 sample using the Chowdhury approach

## Allocation of School Sample in Norway (4)

| Explicit Strata | Total Sampled Schools | Ineligible Schools | Participating Schools |  |  | Refusal <br> Schools | Excluded Schools |

## Eng/Afr/Zulu - RSA (5)

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools, very small schools (measure of size < 6), schools with less than 30 learners, and Afrikaans \& IsiZulu \& English schools
- Within-school exclusions consisted of non-native language speakers

## Sample Design

- Explicit stratification by language (Afrikaans only, English only, IsiZulu only, Afrikaans and English schools, IsiZulu and English schools)
- No implicit stratification
- Sampled two classrooms in bilingual schools
- The PIRLS Grade 5 sample was selected by controlling for the overlap with the Grade 4 PIRLS Literacy sample using the Chowdhury approach
- Class group option was used in bilingual schools

Allocation of School Sample in Eng/Afr/Zulu - RSA (5)

| Total | 168 | 0 | 168 | 0 | 0 | 0 | 0 |

## Abu Dhabi, United Arab Emirates

## Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of remote schools, and schools with an instructional language other than Arabic or English
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

## Sample Design

- Explicit stratification by region (Abu Dhabi, Al Ain, Al Gharbia), school type (public, private), language (Arabic, English), and curriculum (4)
- No implicit stratification
- All Private English schools with curriculum not from United Kingdom, United States, or Canada, were sampled in the regions Abu Dhabi and Al Ain. Two classrooms selected within these schools whenever possible. In these census strata, classes or half classes were used to build jackknife replicates for variance estimation. Sampled one classroom per school in other strata.
